- read about the importance of sleep and about how people deal with stress
- listen to a patient talking about his experience at the Lung and Sleep Centre
- use vocabulary related to sleep
- talk about sleeping hours and ways to relax
- write a description of a dream, about what you and your family do together to relax and a diary entry

A healthy and active brain

Before you begin

- 1 Look at the pictures. Do you know what happens in our brains when we sleep? What do you think are the health benefits of sleep? Do you think that enough sleep makes you active during the day?
- 2 **DW** Read the words in the box. Which words refer to parts of the body? Which words are associated with sleep? Check the meaning of any words you don't know in the **Activity Book glossary** or in a dictionary.

brainwave eyelids heartbeat
immune system muscle REM soundly

- 3 **▶▶** Read and listen to the following article about sleep. Check your answers to exercise 1.

The importance of sleep

Sleep is an essential part of life. Although we think of sleep as a time when we rest completely, it's actually a very busy period for the brain. Scientists claim that sleep is the time when information is sorted and stored by the brain. Sleep is important for reducing stress and keeping the heart, the immune system and the memory healthy.

Scientists have already identified five sleep stages by

15 studying brainwaves. Stage 1 is when we begin to fall asleep. The brain tells the muscles to relax and the heart to beat slowly. This stage makes up about 5% of a young adult's sleeping time.

20 Stage 2 is a period of deeper sleep. The heartbeat and breathing become slower. This stage makes up about 44% to 55% of a young adult's sleeping time.

30 Stages 3 and 4 are when we sleep most soundly. Now the brainwaves and heartbeat are at their slowest and our

muscles become very relaxed. We might have some dreams in this stage, which makes up about 15% to 23% of a young adult's sleeping time.

35 Stage 5 is called the REM (Rapid Eye Movement) stage. Although our body is resting, our eyes are moving very quickly beneath our eyelids during this stage. Our heartbeat and breathing become faster, and this is when dreams are most frequent. This stage makes up about 20% to 25% of a young adult's sleeping time.

Comprehension

4  Read and listen to the article again.

Match the stages of sleep with the events that happen.

What is the normal heart rate for a healthy adult, in a normal resting state?

Reading

- 1 Work in pairs. Do you ever get stressed? What kind of things make you feel stressed?
- 2 Read about how three people relax or deal with stress. Do you relax in the same ways as any of these people? Discuss with a partner.

A

Zainab: Every time I have exam preparations, I get very stressed and worried. I always wonder whether I will have time to study for all the subjects. I know that I will pass all my exams, as usual, but I always aim at getting high grades. Sometimes the stress that I experience stops me from concentrating on my studies. Mum is very patient with me and she knows very well the kind of stress that I go through before every exam. So she helps me to prepare a well-organised revision timetable, and that makes me feel more confident. I also make sure that I get enough sleep, and I go for a walk every afternoon, which helps me to relax.

B

Andy: I work in a bank in the City of London. I earn a lot of money and have an interesting job, but sometimes I feel really stressed. I travel to work by train, but it takes three hours every day, which is very exhausting. To forget all the stress of the day, I go running after work. Jogging is a great form of exercise. I immediately stop feeling so tense and begin to relax.

C

Waleed: I love my job as a doctor! It makes me really happy to see how patients improve, and most of them are very grateful to the hospital staff.

Sometimes, though, we have to make difficult decisions about people, which can be very stressful. Stress is something all doctors have to live with. We usually have to work long hours, and sometimes I get upset if a person is very ill. When that happens, I think about all the positive things that have already happened to me that day, and it makes the situation seem a lot better.

Pronunciation

- 3  Listen to the words in the box. Notice how the underlined letters are pronounced. Listen again and repeat.

subject stress stop through improve grateful

How to relax

Husam spends a lot of time on his homework. His parents are worried because they think that he is studying too hard and that he's not getting enough sleep. The problem is that Husam finds it hard to relax. Husam needs to stop work at nine o'clock each evening and read in bed so that he can relax.

5 Salma has two small children. They are usually awake at night, so she often feels exhausted. She needs to nap at the same time as her children, after lunch. This is how she can make her life much less tiring.

10 Laith is old and lonely. His wife has recently become ill, and he's very sad. When people try to help him, he doesn't communicate well with them. He needs to talk to someone and share his feelings so that he becomes less stressed.

If Husam got enough sleep, he would be able to relax.

- 3 The article below is about flower festivals in different places in the world. In your opinion, why do people celebrate flowers? Discuss with your partner, and then read the text to find out.

People have celebrated festivals from the earliest times in history, and many countries love to celebrate nature. Many countries around the world hold flower festivals. Most
5 of these festivals celebrate the flower that represents either the whole country or a particular region. In each country, there are parties, entertainments, family get-togethers and a commemoration of traditions and
10 culture.

In Henan Province in China, people celebrate the Luoyang Peony Festival from 15th to 25th April every year. The peony symbolises wealth and nobility in China, but the colourful flower
15 also has a legend attached! It is said that Empress Wu of the Tang Dynasty banished the peony from her city to the city of Luoyang, where it has bloomed abundantly every year since. Certainly, if you go to Luoyang at this
20 time of year, you will see millions of peony plants in Luoyang Peony Gardens. You can also take part in celebrations such as dance competitions and cultural fairs, as well as watch music and drama spectacles.

25 Jordan's national flower is the beautiful black iris, a rare flowering plant that is remarkable because it grows among rocks. It is admired for its unique beauty and strength. It is found mainly in the district of Ajloun, north of

30 Jordan, during February and March. Every year, Jordanians honour their national flower by putting on a day of festivities. There are classic car displays, local craft stalls, dance displays, comedians and entertainment designed
35 for children too. All the money that is raised during the Black Iris Festival is donated to local charities.

In the 17th century, tulips were imported from the Middle East to the Netherlands. They are
40 one of the most popular ways to 'say it with flowers', or to send messages of congratulations to loved ones. The Tulip Festival takes place every spring in the North East of Holland, an area that is famous for its colourful tulip fields.
45 People come from all over the world to go on tulip tours, travelling by bike or by bus. A popular activity is watching people dance in traditional wooden shoes that are called clogs. They can also see photographic exhibitions,
50 eat traditional food and, above all, visit the magnificent tulip gardens.

Welcoming new babies around the world

The birth of a newborn baby is a special occasion all over the world, and of course there are many traditions that follow similar patterns worldwide. However, there are some that are peculiar to one country or a group of countries. Here is a guide to some of the more diverse ways to observe this universally important event.

1 Newborn baby girls are likely to be welcomed into the world with a tree-planting party in _____. The baby's relatives typically plant two trees, which are then chopped down and sold when she gets engaged. The proceeds from this tree-planting venture are then used to buy her wedding dress. Additionally, the German government has come up with a list of accepted names, which parents are expected to choose from when they name their child.

2 In _____, new mothers might well ask you not to give them gifts until the baby has been born. When a mother has given birth, she is supposed to stay inside with her baby for 28 to 40 days. This is

to protect the baby's immune system, and develop the bond between mother and baby. After this period, mother and baby will be capable of going out to visit neighbours and family. This is when you should give them gifts.

3 You won't see a newborn baby lying on a blanket in any homes in _____. Tradition there means that relatives are willing to carry the baby around for about 100 days at the beginning of his or her life. This period of healing and holding might well last longer than this, as well!

4 In several Muslim countries, including _____, new parents are likely to shave the head of their week-old baby, and then weigh the hair. The parents are expected to give gold and silver to charity after the birth, to thank God for blessing them with a child. The weight of the hair should be equal to the amount of gold and silver that is given. This custom might well form a part of an *aqiqah*, or welcoming ceremony, where the baby is given his or her name.

Special Olympics

In the early 1960s, Eunice Kennedy Shriver, a university athlete from the USA, decided to give children with intellectual disabilities the chance to take part in sports. She felt that they were unfairly excluded from sporting events. So she held a one-day event for these children in her own garden. Eight years later, in 1968 CE, the first International
5 Special Summer Olympic Games were held in the USA. A thousand people with intellectual disabilities from the USA and Canada competed in different sports.

Today, Special Olympics is the world's largest sports organisation for children and adults with intellectual disabilities. The Special Olympics World Games are held every two years, with more than 32 Olympic-style sports, including gymnastics, football and swimming.

10 El-Araby Houfeya is a Special Olympics athlete from Morocco. When he was very young, he was told that he had an intellectual disability. He accepted that he would never achieve the same success as his six siblings. He learnt how to read and write, and spent a lot of time playing football with other boys in the neighbourhood. Then, one day in 1992 CE, he took part in a football competition. Although he hadn't had any formal training, he
15 impressed spectators with his skill. After the game, Princess Lalla Amina of Morocco, who supported Special Olympics in her country, asked to meet this talented boy. She told him about Special Olympics Morocco. El-Araby Houfeya joined the organisation and began to take part in their events. It was a moment that changed his life.

El-Araby Houfeya did horseriding and played football in Special Olympics competitions,
20 and, through the organisation, began to travel to different countries. His confidence in himself grew, and he realised that perhaps his sporting talent wasn't the only talent he had. He began to look for employment, and eventually took a job with a security company. This helped him to become more financially independent.

However, Charlotte, who is Valegro's trainer as well as his rider, comes from a humble background.

She was born in a town north of London that is called Enfield, and her love for horses and riding began at the early age of two years old! Charlotte's mother was fond of horses and so she understood Charlotte's love for the animals and her hobby. Both Charlotte's parents worked extremely hard

to make enough money to fund Charlotte's passion. Charlotte grew up with horses, taking lessons at the local riding school and spending as much of her free time as she could helping out to care for the horses she rode.

Since she was 16 years old, Charlotte has been working at the stables of a famous horseman, Carl Hester. Carl asked her to work for him, as a groom, after she won a competition. Hester asked Charlotte to train Valegro, and they made an excellent team from the beginning. Their partnership has been developing ever since.

Charlotte's passion has not been lessened by her success. She trains hard, of course, but she says that she still finds time to relax with Valegro, going for rides in the countryside near her parents' home. Ever since her first global success, she has been trying as hard as she can to keep her home life as simple and stress-free as possible, by spending time at home.

She says that her family and friends (and horse) are the reason she has been able to stay relaxed and confident enough to keep up her score of unbroken records. However, her mother says she has always known Charlotte would be a star!

Cycling: past, present and future

Amman at 7:30 am on a day in spring, 2014 CE: People are on their way to work. Some are driving; some are walking and some are cycling along a cycle route.

Ten years ago, cycling in Jordan was almost unheard of. Nowadays, cyclists are everywhere; cycling is fast becoming both a popular hobby and a useful mode of transport.

Organisations such as *Cycling Jordan* have been set up to promote the ecological and health benefits of the sport. These have been a great success, with bicycle-hire businesses starting up, and cycling tours of the country becoming more and more common.

The cycling movement has grown to include school children, teenagers, families and aspiring athletes. Cycling is one of the most flexible forms of transport, for a long-distance journey through the mountains or a quick trip to the shops!

Despite this, there is still work to be done if more people are to take up cycling. The roads are still not safe enough, and knowledge about how to cycle safely is not yet widespread.

Share the Road, a branch of *Cycling Jordan*, is working to spread awareness of how to cycle safely, both in the city and on long-distance bike rides. It offers advice to motorists on how to drive with cyclists on the road, and advice to cyclists – of which the most important must be 'Wear a helmet at all times'. Hopefully, as awareness of how to cycle safely spreads, more and more people will join the cycling revolution!

Writing a three-paragraph essay

- Write a plan for three paragraphs: introduction, body and conclusion.
- In the first paragraph, introduce the topic and include a thesis statement.
- In the developing paragraph explain the three factors.
- In the third paragraph summarise the main points.

Project

Research a sport.

Your task

- Choose a sport you'd like to learn more about or you'd like to tell someone about. Identify your purpose and your readers.
- Research the topic aiming to answer the *What, When, Who, Where, Why* and *How* of the sport. Read various articles and take notes.
- Make a plan. The introduction has to catch your readers' attention. The middle of the article has to develop the answers about the sport. The end has to be appealing.
- Write a draft. Use simple clear language. Decide on the style and tone.
- Rewrite the draft to shape it into a magazine article that contributes positively to the topic. Start with a quote or an interesting incident and end in a captivating way – just like the introduction.

- 6** Read this article about the Olympic Opening Ceremony. Give two ways in which the writer thinks it is special.

In the summer of 2012, incredible sporting achievements were celebrated with a unique theatrical spectacle that marked the opening of the Olympics in London. The Olympic stadium was transformed into a stage for a four-hour event that told the history of

5 Britain, up until the modern day.

The spectacle involved thousands of volunteers.

These amateur performers and crew put together an incredible show, demonstrating impressive teamwork and a professional attitude throughout. The volunteer cast took the audience on a time-travelling journey from rural England, through the Industrial Revolution, to the 1960s, using dances and sketches that represented each decade.

15 The special effects were also impressive, with light-shows, optical illusions, incredible scene changes and smooth mechanics. It was a spectacle that appealed to the emotions too. Moments of pride followed moments of humour. Rowan Atkinson (better known as Mr Bean) interrupted an orchestral piece in his own comic style.

After an event such as this, only one thing remained: to pay tribute to the athletes taking part in the Summer Olympics. The Olympians marched around the stadium, capturing the magic of this moment! As the audience watched breathlessly, the Olympics were declared officially open.

25 To this day, audience members and people who watched the spectacle on their televisions are still talking about the incredible achievement of this celebratory opening ceremony.

- 7** Answer the following questions with a partner.

- 1 Read the description for a second time and give the ceremony a name. Why did you choose this name?
- 2 In the second paragraph, the writer mentions the volunteers. What two aspects of their participation is the writer impressed by?
- 3 Summarise the four main elements of the show in your own words. Write about 50 words.
- 4 Why do you think the spectacle made such a big impression on its audience?

- 8** Imagine you're at the Olympic Games and you are now writing postcards. Write a postcard to a friend telling them about what you have done and seen so far.

- 9** Next write a postcard to your mother, telling her about your plans, and what you promise to do when you get back.

Reading strategies

Completing a text

- Read through the text first to have an idea of what it is about.
- Look at the words in the box. Think about how each word is used.
- Look at each gap and consider the best word to insert in the gap.

Teacher: Our project today is to find out about renewable energy resources. That means resources which are continually replaced and will not run out any time soon. Ramzi, what have you
5 chosen as an example of a renewable resource?

Ramzi: The sun is a renewable source of energy. A lot of living things depend on its energy for heat and light. This energy can also be captured and used to power things. For example, if you have a
10 (1) _____ calculator, it contains a solar (2) _____, which uses sunlight to power the calculator.

Solar (3) _____ that are used on houses have thousands of solar cells, and they make electricity from the sun's heat. The major advantage of solar
15 energy is that, after the solar panels have been installed, electricity is not expensive to generate.

Teacher: What about you, Nadia? What did you find out?

Nadia: In windy places, wind energy can be used
20 to make electricity, using wind (4) _____. These turbines are found in 'wind farms'. They have blades that are attached to a (5) _____ at the centre. The wind spins the blades and the generator runs. This makes (6) _____. However,
25 wind turbines can't work if there is no wind, and sometimes the wind speed is so high it damages them.

Teacher: Ibrahim, what's your example of a renewable resource?

Ibrahim: It's biomass. Biomass is (7) _____ material and animal waste that is used as (8) _____. For example, wood is a biomass fuel as long as we continue to plant new trees to replace those
35 we cut down. Biomass can be used to provide heat and also to make electricity. The biomass is burnt to heat water and make (9) _____. The steam is then used to make electricity.

Comprehension

4  Read and listen to the conversation again and answer the questions.

- 1 What do the underlined words refer to?
- 2 Which is the only form of renewable energy that is a fuel?
- 3 What disadvantages do the three energy sources have? Complete the following table.

Disadvantages of energy sources		
Solar	Wind	Biomass

- 4 In what other situations would biomass fuel not be renewable? Explain your answer.
- 5 Which of the energy sources in exercise 3 do you think is the best for producing electricity? Justify your answer.
- 6 Wind turbines are expensive to build and maintain although the electricity they generate does not cost much at all. Is wind power a good source of renewable energy?

Grammar: Reported speech (all tenses)

6 Dr Peter Green, an expert in renewable energy sources, talks about how waste can be reused to produce energy. Summarise his report, beginning *Dr Green said (that) ...*

“In New Jersey, USA, there has been a problem with growing rubbish dumps for almost a century. The issue became so great on one island in the area that there was more space taken up by waste than living space. The island was finally called a ‘toxic zone’, and people were told to leave the island. For a while, the dump
5 grew and grew, until a group of scientists visited the island because they had decided to convert this waste into fuel. After this, experts in the field have worked hard to create a cleaner, ‘greener’ New Jersey, and these days, rubbish dumps are carefully separated into reusable and unusable waste. The forward-thinking state set a good example, and now not only the rest of the USA, but also some other
10 countries such as Russia and China are following New Jersey’s lead.”

6 Look at the photograph on the right. What concept does it suggest? Complete the following chart accordingly in your notebook. Then, extend the diagram to include examples of each concept.

Reading

7 Read the text below. What does it describe?

Crude oil is currently the most important source of energy in the world. It is a fossil fuel which is formed over many years by the decomposition of organic compounds, or anything that contains the element Carbon. These organic materials come from the remains of animals and plants. When sediment and other organic materials are buried deep under the ground under high temperature and pressure, crude oil is formed. It then undergoes many different processes before it is ready to be used as energy, and from it we get petrol, diesel and kerosene, among other fuels. However, due to the time taken to form new supplies of crude oil, it is considered to be a finite, non-renewable source of energy.

8 Find the words 1–4 in the text and match them with their definitions a–d.

- | | |
|-----------------|---|
| 1 decomposition | a matter that settles to the bottom of a liquid |
| 2 organic | b the process of decaying |
| 3 sediment | c limited in size or supply |
| 4 finite | d something that came from living matter |

Writing

9 The text in exercise 7 states that crude oil is currently the most important source of energy in the world. Do some research, make notes and write a short report to explain this statement in three paragraphs divided as follows:

- 3  Read and listen to the quiz show. What subjects does the quizmaster ask Jamal about?

MASTERMIND

Quizmaster: Today on the show we have Jamal Sabah, who is a self-taught expert on the history and future of Earth's resources. Jamal, you are going to answer as many questions as you can about Earth's resources.

Jamal: OK.

Quizmaster: Start the clock! What are the seven types of renewable energy?

Jamal: They are solar, wind, hydro, biomass, wave, tidal and geothermal.

Quizmaster: Correct! Why is solar energy called 'primary renewable energy'?

Jamal: It's the origin of many other sources of energy. It's also the most abundant renewable energy resource.

Quizmaster: Is wood a renewable energy source?

Jamal: Er, it is in Europe. However, if growing it, cutting it, drying it and transporting it uses more energy than it actually provides when it's burnt, we cannot say that it is renewable.

Quizmaster: What is the difference between renewable and fossil fuels?

Jamal: Time. Fossil fuels were created longer ago, but both fuels are derived from living matter.

Quizmaster: What are the two main kinds of solar technology?

Jamal: Solar Water Heating, which delivers hot water through pipes, and Solar PV, or photovoltaics, which delivers electricity through cables.

Quizmaster: Which country is the largest producer of nuclear power?

Jamal: I think that it's the USA. I read somewhere that they produce 30 per cent of all the nuclear-generated electricity in the world.

Quizmaster: Finally, what energy source, according to experts, will be the most common in the future?

Jamal: That's a difficult question. Erm, experts say it will be nuclear power, but they also say that we have to develop the way it is produced because otherwise it will be very dangerous.

Quizmaster: Well, thank you Jamal. I can tell you that you got every single question right. Well done!

Zaid: So, what was the hardest question you were asked?

Jamal: I was asked what source of energy (1) *would be / will be / is* the main energy source in the future. I wasn't sure at first, but I got the answer right!

Zaid: What else did he ask you?

Jamal: It's hard to remember! He asked me if wood (2) *is / has been / was* a renewable energy source.

Zaid: Oh, right. Did he ask you anything else?

Jamal: He asked me why solar energy (3) *is / had been / will be* given the term 'primary renewable energy'.

Water resources in Jordan

Water is essential for life. Our wellbeing, sanitation, agriculture and industry all count upon a supply of water. Beyond these uses, water brings countless other benefits to society. We use it to swim in, sail on and take pleasure in the numerous plants and animals that depend on it. In addition, our health and environment are reliant on an effective wastewater infrastructure. Jordan's scarcity of water is a long-term challenge for environmentalists. Water resources in Jordan have remained quite stable over the years, but Jordan has become a densely-populated country. Current use of water already exceeds renewable supply.

15 **Consequently, the Jordanian government have released the following notice to commence raising awareness of this matter.**

1. Jordanians must recognise that the available water supply is finite, and they must take responsibility for this issue within their own households.
2. Accountability must be assumed for water

management in Jordan. This responsibility should be recognised by individual citizens, the public sector and the private sector alike. The situation necessitates the combined effort of the Jordanian people to improve conditions within their own environs.

3. A deeper understanding of the available amounts, actual quality and natural protection of Jordan's water resources must be reached. This knowledge will be circulated in schools and throughout the community.

4. Water must be used more efficiently, with more regard for energy needed to heat water for daily usage.

5. Healthy aquatic ecosystems are vital to a high quality of life for Jordanians and must be preserved.

40 6. The quality and standards of drinking water will be consistently maintained to ensure that Jordanians have potable water that is free from pollutants.

- 4 In point 2 of the notice, what idea is being expressed here? Write one sentence.
- 5 An educational programme is proposed in point 3. What is its purpose? Explain in your own words.

- 6 In point 4, what does the word 'regard' imply?
- 7 Why do you think point 5 is considered an important issue to the government?
- 8 What does point 6 say will be done to make sure that drinking water is safe?

Charles Dickens

Charles Dickens was born on 7th February, 1812, in Portsmouth, on the southern coast of England.

He was a quiet boy, who loved reading. When he spoke later of his childhood, he said that he remembered listening to children playing outside, as he sat indoors. He always preferred reading to playing with other children.

At the age of 12, life for his family changed very suddenly. His father had financial problems, so Charles was no longer able to attend school regularly, and he had to work at a factory. The loneliness he felt there was an important influence on his writing, especially in his books *Great Expectations* and *David Copperfield*.

When he was 14, Charles stopped going to school altogether and started working as a

clerk in a lawyer's office in London. He didn't like working there.

Luckily, things changed for him again. Charles had always wanted to be a writer, and he became a very respected journalist. He began to write short pieces for publication in the newspaper. In 1836, a series of pieces called *The Pickwick Papers* appeared monthly in the newspaper and were very popular. Dickens was a famous author by then.

Throughout his life, Dickens enjoyed travelling. He travelled to many countries, writing novels and giving talks about the cruelty of slavery. Novels such as *Oliver Twist* and *Dombey and Son* highlighted the cruel treatment of people, especially children, and child labour in the 19th century.

He died on 8th June, 1870, at the age of 58.

Reading

1 Read the blurb of *Oliver Twist* and answer the questions.

- 1 Where and when does the story take place?
- 2 Who is the main character?

2 Read this review of *Oliver Twist*.

Does the writer recommend the book? Why / Why not?

Oliver Twist is an orphan who lives in a Victorian workhouse. Life is cruel there, and Oliver suffers a lot. At the age of eleven, he escapes to London, where he meets a boy called Artful Dodger and a man called Fagin, who is the leader of a group of thieves. They are kind to Oliver, but try to teach him to steal. Luckily, Oliver also finds good friends, like Mr Brownlow and Rose Maylie, who want to look after him – but can they protect him from the difficult life of a poor, homeless boy in 19th-century London?

Oliver Twist

Oliver Twist is one of Charles Dickens' most famous novels and it tells the tale of a young orphan named Oliver. Oliver endures difficult times in
5 19th-century London, a city full of poverty and crime.

The story, like many of Dickens' other novels, paints a vivid picture of life for the working class, especially
10 children, during the industrialisation of England.

Born in a workhouse, Oliver is treated cruelly, and like all children in a similar position, has to work hard at a
15 young age.

Because of his kind and timid nature, he is often taken advantage of. One of the novel's most famous lines, 'Please sir, I want some more,' is said when
20 Oliver is persuaded by the other boys in the workhouse to ask for another bowl of soup at dinner time. This is unheard of in the workhouse and Oliver is punished for saying it. The
25 incident is the first of many new obstacles he has to face.

As the story progresses, we come across characters like Fagin – a sly old man who 'takes care of' a group
30 of thieving children – the villain, Bill

Sikes, and kind Rose and Nancy.

Oliver Twist is a story with many different characters, so it can sometimes get confusing because you
35 have to keep track of so many people. However, Dickens is very skilled at using powerful descriptions of his characters to evoke strong feelings in the reader, feelings of sympathy as
40 well as outrage. Because the characters are so well described, they leave a very memorable image in your mind and this helps to remember who is who.

My favourite character is Mr
45 Brownlow, a kind and generous man, who tries to protect Oliver from the life of poverty and crime that seems inevitable for him. After Oliver is wrongly accused of a robbery, it is Mr
50 Brownlow who believes he is telling the truth, and saves him.

My only complaint was the pace of the book; at the beginning it progresses quite slowly and then suddenly seems
55 to speed up, leading to confusion at the end. However, none of these things alter my opinion that it is a very fine novel, and it is not difficult to see why
60 it has such a special place in English literature.

Comprehension

- 3 Read the review again and write answers to the questions in your notebook.
- 1 What do the underlined words refer to?
 - 2 Why is an early incident in the workhouse so important in the novel?
 - 3 What does the reviewer of the book think of Dickens' writing style?
 - 4 How does Dickens help the reader to remember all the different characters?
 - 5 How does the reviewer feel about Mr Brownlow?
 - 6 What negative opinion does the reviewer give about the novel?
 - 7 Re-read the last paragraph of the review and translate it into Arabic.

Speaking

- 4 Read the extracts from blurbs of books 1–6. Which of the questions in the box are they answering?

What is the title and who is the author? What type of story is it?
Where is the story set? Who is the main character?
Do you like the way that the book is written? Give reasons.
Would you recommend this book? Give reasons.

- 1 The main character is a boy called Huckleberry Finn.
 - 2 Yes, I do. It's lively and amusing.
 - 3 It's called *The Old Man and the Sea*, by Ernest Hemingway.
 - 4 It's an exciting thriller. I couldn't put it down.
 - 5 The story takes place in Medieval Italy.
 - 6 I would recommend this book. It is very exciting.
- 5 Choose a book that you have read. Then work in pairs to ask and answer the questions in exercise 4.

Writing

- Read your notes and pick out the most important parts of the story.
- Make sure that you do not include the ending in order to create suspense.
- Organise your notes – check that the events in your blurb will be in the same order as the story.

- 3  Read and listen to the text and check your answers to exercise 1.

The language of Braille

Communication, the sharing of information, ideas and thoughts, can take many forms. Before the development of writing, people communicated via smoke signals, cave paintings and drumbeats. The first systems of writing used pictures to convey meaning. Gradually, as language developed, alphabets evolved, using letters and symbols which represented sounds. These sounds in turn made up words.

The invention of the printing press in the 15th century led to the first forms of mass media: newspapers and magazines. Until then, it hadn't been possible to reach thousands of readers at the same time. However, only sighted people could access these media.

This all changed in 1821 CE. It happened when an officer in the military in France was visiting the Royal Institute of the Blind in Paris. He wanted to demonstrate to the students a system of dots he had invented. These dots allowed soldiers to communicate without

speaking. This method of communication caught the attention of Louis Braille, a young man who was studying at the Institute.

After many years of work, Louis Braille had improved and completed the system of raised dots, which became known as Braille. The characters consist of six tactile dots that can form 64 combinations, spelling out letters, numbers and symbols.

By 1868 CE, 16 years after Louis Braille's death, blind people all over the world were using Braille every day. It has also been adapted to scripts in different languages. It enables blind people to read books, maps and labels, and even to press buttons in a lift. A wide range of national daily newspapers are available in Braille, too.

Nowadays, screen-reading software means that the text on a computer screen can be heard aloud. Digital talking books that simultaneously generate output in Braille are also available.

Think back to your childhood: playing house, cooking on a campfire and flying a kite. Are these things that you had done by the time you were twelve? If not, you've missed out on some

important experiences, according to a new report.

The report contains a list of activities that children should experience so that they learn about how people communicate with each other and with nature. The report has been written to

try to limit the amount of time that children are spending indoors and on computer games these days. Volunteers were asked to contribute their favourite childhood memories to the list, and from the 400 suggestions, a short list of fifty was compiled.

On the list were these activities:

- catching fish with a net
- eating an apple straight from the tree
- looking for treasure on the beach
- playing hide and seek
- running around in the meadow
- exploring rock pools at the seaside

The report says that many adults could remember a different type of childhood: one in which they had more freedom than children do these days. The author of the report says that she and other colleagues felt that children today hadn't been given the chance to experience nature and learn about the world and human relationships in the same way.

Comprehension

- 7 Read the article again. Decide if the sentences are true or false. Correct the false sentences.

- 1 Playing house, cooking on a campfire and flying a kite are inessential experiences for children.
- 2 The report was written to encourage children to do more outdoor activities.
- 3 Children in the past did the same activities as children do now, but they had more freedom.

Speaking

- 8 Work in pairs. Read the list of activities again. Which of those on the list had you experienced before you were twelve? What other outdoor activities had you experienced? How do you think it has helped you become who you are today?

Writing

- 9 Think about your childhood. By what age had you learnt the skills in the box? Write a paragraph using the Past Perfect. Add other ideas of your own in another paragraph.

walk ride a bike read fly a kite write tell the time
tie shoelaces add and subtract sums speak a second language

By the time I was one, I had learnt to walk.

Reading

1 Look at the headlines of four articles. What do you think the articles have in common?

- 1 Holiday message is 50 years late
- 2 From mobile messaging to published book – communication becomes art
- 3 'Air-mail' brings best friends together
- 4 Humans not alone in using sign language

2 Read the following articles. Match the headlines in exercise 1 with the articles A–D.

A

A scientific research project has found that wild chimpanzees use at least 66 gestures to communicate with each other.

After researchers had spent time with the animals in Borneo, **they** studied 120 hours of video they had recorded. They were looking for signs that the animals were using signals to communicate with each other.

They looked to see if the chimps were looking at each other, in order to be sure that the gestures had a purpose, that is, to communicate something. If the animal didn't respond to the gesture, the gesture was made over and over again, until there was a response.

The results suggest that there is a common system of communication across the species.

B

A postcard sent from Florida has finally reached **its** destination in England. It had been posted in 1957 CE!

This postcard had been addressed to someone working at an education centre. The building had once been a school. Staff at the education centre have been trying to find the addressee.

The card, which appears to have been written by a grandparent, describes a trip to Florida, USA. He wrote that it had rained a bit that day but it was still hot.

A spokesperson for the Post Office said that the postcard had probably been put back in a postbox recently. He said that the mail was never in the sorting office for that length of time.

C

In 2001 CE, a girl called Laura Buxton, from Staffordshire, UK, wrote a message with her name and address on a helium-filled balloon. She then sent **it** into the air, where it disappeared.

A few weeks later, the balloon landed nearly 200 kilometres away in southern England. The man who found it took it to his neighbours, the Buxtons, who had a daughter called Laura. They were surprised to learn that it was from another girl with the same name.

The two girls got in touch with each other, decided to meet and became best friends.

D

An artist has kept all her text messages, and after twelve years, she had collected about 100,000 messages. She kept the first few messages because she enjoyed reading them over again – it was like a personal diary. It is also a record of history, covering world events.

Every time a text message arrived, she saved the contents. She wrote **them** in notebooks when her phone ran out of space to store them. She eventually filled more than 60 notebooks. Then she started copying them on to her computer.

The woman took her collection to a publisher, and the book has now been published and translated into several languages.

Vocabulary: Means of communication

- 3 Underline all of the words that are forms of communication in the articles. One word has been done for you. Which words are *written* forms of communication?

Comprehension

Speaking

- 5 Read this extract from a novel quickly. Which newspaper article from exercise 2 has the same content? Discuss with your partner and give reasons.

When I was ten, my grandfather was having his 60th birthday party. It was a lovely summer day, and the party was in the garden. I suddenly had an idea.

5 I untied one of the brightly coloured helium-filled balloons and wrote a message with my name and address on it. Then I sent it into the air, where the gentle breeze carried it off, high above the clouds.

10 A few weeks later, the green balloon landed in some thick bushes nearly 200 kilometres away in southern England.

A man, who was working in his garden,

15 found it lying there. He read the message and a puzzled look came across his face. He thought that it must belong to his neighbours' daughter and took it to his neighbours' house. They were shocked to learn that it was from another girl with the same name – me!

20 When the other Laura and I met, we couldn't believe it. We were the same age and height, and we both had brown hair cut in exactly the same style.

25 Of course, we became friends and we have been best friends ever since.

- 6 Work in pairs. What are the differences in the two ways of telling the story? What additional information do you learn in the novel in exercise 5?

Unit 9

Food

Grammar the causative

Before you begin

- 1 Look at the photographs. Which foods have you tried before? Which foods would you like to try? Discuss in pairs.
- 2 **DW** Read the words in the box. Which words refer to the names of the foods in the photographs? Check the meaning of any words you don't know in the **Activity Book glossary** or in a dictionary.

ceviche durian mansaf marinated raw seasoned spiced stew

- 3 **🔊** Steven and Robert have just returned from a trip around the world. Read and listen to Steven's account of the different kinds of food they ate. Which food did they like the most?

Different cultures, different food

In **Thailand**, we ate the strangest fruit, the durian. We had it picked right from the tree. It's a huge tropical fruit with a spiky skin. Its smell is so strong that it has been officially forbidden in many public places in Asia! We got it cut open and chopped, and then we ate it raw.

In **South Africa**, we ate a stew made from flowers, which smelt lovely! The flowers grow on top of the water in lakes. We had the flowers cooked with meat and vegetables in a large pot.

We also tried raw fish in **Peru**. It's called *ceviche*, which is a seafood dish. It is made from fresh raw fish, marinated in lemon juice. Robert didn't want it served raw at

first, but when he tried it he loved it as much as I did!

In **Jordan**, where our friend Ramzi lives, we tried the most delicious dish. It's actually Jordan's national dish, *mansaf*. It's lamb seasoned with aromatic herbs, sometimes lightly spiced and cooked in yoghurt. It's always served with huge quantities of rice. We had it prepared by Ramzi's mum and it was very delicious! Even though we were full after one dish, she insisted on serving us another, followed by some Arabic sweets, *kunafah*. That was very typical of the Jordanians' hospitality and generosity. Next time I visit Ramzi, I want my favourite dish prepared the first day I arrive!

Speaking

1 Work in pairs. What kind of pizza do you like?

Reading

2 What three ingredients do you think are traditionally in a Margherita pizza? Read the text and check your answer.

The history of pizza

The earliest form of pizza was invented when soldiers needed food to take with them on long marches. They baked a kind of bread flat on their shields and then covered it with cheese and dates. This early pizza was a convenient, healthy food for people who were constantly on the move. The wheat flour base provided energy in the form of carbohydrates, the cheese gave the soldiers calcium, which kept their bones and teeth healthy, and the dates provided protein, fibre and various vitamins and minerals that are necessary to keep the body healthy. Pizza is also mentioned in the 3rd century BC, when there was written evidence of a flat round bread that had olive oil, herbs and honey on the top. It was baked on hot stones.

When people explored the remains of Pompeii, Italy, they found evidence of a flat flour cake that was baked and widely eaten there at that time. There was also evidence of the first pizza restaurants in Pompeii in the 16th century CE. Visitors can see the pizza ovens in the ruins, even today.

In 1522 CE, travellers returning to Europe from Peru brought back tomatoes with them. The people of Naples added the new tomatoes to their bread, which consisted of flour, oil, salt and yeast, and created the first simple pizza.

In 1889 CE, the King of Italy and his wife, Queen Margherita, were on holiday in Naples in Italy. They asked a famous pizza chef to come and cook for them. He prepared three kinds of pizza. The Queen's favourite one was the one that had been made with a white cheese called mozzarella, a green herb called basil, and ripe, red tomatoes. These were exactly the colours of the Italian flag. The chef named this pizza in honour of the Queen: the Margherita.

In the late 19th century CE, pizza became a popular snack that was sold from stalls on the streets of Naples. When many Italians emigrated to America in the 19th century CE, they took the recipe for pizza with them. Its popularity there spread all over the world, and today it is a favourite dish in almost every country.

Grammar

modal verbs of possibility in the past: *must/could/might have (been)*

Before you begin

- 1 Look at the photographs of Petra. Do you know who lived there in the past? What do you think life was like back then? Discuss with a partner.
- 2  Read and listen to the text and check your answers to exercise 1. Then, make a list of new words and check their meaning in the **Activity Book glossary** or in a dictionary.

WHO WERE THE NABATEANS?

In Petra, Jordan, there lie the remains of a majestic city carved out of the desert rock. This city was the main area inhabited by the Nabateans, who migrated gradually from Arabia. Originally, they were a nomadic people who chose to settle in various places, such as southern Jordan, the Naqab Desert and northern Arabia.

There is little known about the lifestyle of the Nabateans, except that they were important traders in the ancient world. They might have traded goods such as spices, gold and animals with civilisations such as China, India and Rome because of their convenient position at a commercial crossroads in the world.

Many Roman writers wrote about what the Nabatean culture must have been like, but no one knows for sure. However, they agree that the language of the Nabateans could have been

a mixture of Arabic and Aramaic. These Roman writers also say that the Nabateans were ruled by a royal family, and that, unlike many cultures in the ancient world, the Nabatean society might not have used any slaves. In addition to that, the Nabateans must have been expert engineers because they managed to build complicated water conservation systems in the desert terrain.

Despite archaeologists' best efforts, there is a limit to what they can tell us about these fascinating people who lived in Jordan such a long time ago. Although it is still difficult to know much, they can't have been illiterate because there are some inscriptions that remain. However, sadly for us, most of the things the Nabateans made and owned have been too easily destroyed by time or lost in the desert.

- 3 Read the article and check your answer to exercise 1.

The Minoan civilisation ruled the Mediterranean island of Crete for 1,500 years, until it was destroyed in 1450 BC. The Minoans built the first paved roads in Europe and introduced running water. They had a powerful navy, which might have been why they were such a strong civilisation for so long.

For many years, people have been trying to find out why this developing civilisation might have disappeared. Even after Crete was hit by a large earthquake around 1,700 BC, the Minoans rebuilt their cities. So what caused their civilisation to end?

10 Many experts say that the end of the Minoan civilisation might have been caused by the eruption of a volcano on the nearby island of Santorini, almost 3,500 years ago.

15 However, at Knossos in Crete, scientists have been examining deposits of ash, marine species, cattle bones and seashells in the soil. How could these deposits have got there? The only answer is that they must have been deposited in Crete by a tsunami.

20 Experts have now pieced together a possible explanation of what might have happened. They believe that several tsunamis might have hit the northern and eastern shores of the island, every thirty minutes due to the eruption of the volcano on Santorini. It must have been a terrifying experience for the Minoans living there!

Comprehension

4 Read the text again and answer the questions.

Revision B

1  Listen to two news reports about a new way of extracting oil that has been discovered.

1 What kind of process is it? Where is it happening?

2 Place these paraphrases into the correct speaker's column in the table below.

a The advantage of fracking is that we will be able to have access to fairly abundant local fuel and therefore become energy-independent.

b Fracking is now a good choice because it is not done in the ocean, and it is cheaper than traditional oil refining.

c Fracking has not been a recognised process for long enough, so we don't know how bad the damage will be in the future.

d This process is used to get access to the oil and gas that is found in rocks.

e Chemicals and water are pushed down into cracks in the rock until the cracks are made wider.

f Chemicals used in fracking are responsible for environmental damage.

Speaker 1	Speaker 2

2  Listen to the reports again. Write notes as you listen. Write a short summary, in your own words, about the advantages and disadvantages of fracking.

3 Think of an author you like. Write down some of the titles of their books and give them to your partner. Your partner will ask you questions about these books. Answer their questions, and then change partners. Report your conversation to your new partner.

4 Complete these questions with the correct verb forms and then ask your partner. Answer your partner's questions.

5 Read this article about the history of pasta. Which cultures have used something similar to pasta?

Pasta is one of the world's most convenient foods. Nearly every country has its own unique version of this easy-to-make, inexpensive dish.

Most people believe that pasta originated in Italy, but in fact, the history of pasta is difficult to trace for several reasons. The word itself is a translation of the verb "to paste" in Italian. This is a reference to the dough which is used to make pasta. The word may come from the Greek *pastein*, which means "to sprinkle". It is also likely that pasta is a descendant of ancient Asian noodles.

A common story is that pasta was brought to Italy from China by Marco Polo. However, pasta was already gaining popularity in other areas of Italy before the time of Polo, which makes this story very unlikely.

Noodles existed in Asia long before Polo's trip to China. Archaeologists believe that central Asia is most likely the first area that produced noodles. From Asia, it travelled to Europe. Some believe that nomadic Arabs brought early forms of pasta westward.

The final journey of pasta occurred during the late 19th century. A large group of immigrants moved from Italy to America, bringing pasta with them. Pasta then became a common food in the United States.

6 Answer the following questions.

- 1 What reason does the writer give for his statement that pasta is a convenient food?
- 2 What point does the writer make about the origins of pasta?
- 3 Describe how pasta 'travelled' from the East to the West in your own words.
- 4 Why do you think that pasta is so popular around the world?
- 5 Why do you think that, despite the very different foods around the world, pasta is basically the same?

7 Imagine you are the judge of a cookery show. One of the contestants has made a dish you don't like at all. Decide with your partner what it is, and what is wrong with it.

You should have fried the onions; you shouldn't have boiled them.

You could have seasoned it better; you shouldn't have used so much salt.

8 Write a criticism of the dish you chose in exercise 7, using cooking vocabulary and past modals. Don't forget to link your sentences well. Write about 75 words.

If

by Rudyard Kipling
(abridged)

If you can keep your head when all about you
Are losing theirs and blaming it on you;
If you can trust yourself when all men doubt you,
But make allowance for their doubting too;
5 If you can wait and not be tired by waiting,
Or, being lied about, don't deal in lies,
Or being hated don't give way to hating,
And yet don't look too good, nor talk too wise;

If you can talk with crowds and keep your virtue,
10 Or walk with Kings – nor lose the common touch,
If neither foes nor loving friends can hurt you,
If all men count with you, but none too much:
If you can fill the unforgiving minute
With sixty seconds' worth of distance run,
15 Yours is the Earth and everything that's in it,
And – which is more – you'll be a Man, my son!

PARAPHRASE BY STANZA

If you can

- 1) remain calm when everyone near you is panicking, and they think you are responsible for the problem;
have confidence that you are acting correctly when everyone thinks you are wrong, but also understand their doubts;
be patient, and tolerate lies being told about you (as well as not being a liar);
not dislike anybody, even if they dislike you;
not try to look or sound too good;
 - 2) not be corrupted by ordinary people or by people in high positions;
be strong enough not to be hurt by either enemies or friends;
value everyone equally;
make the most of every minute of life;
- then you will be a content, honorable and reliable human being.

If I Can Stop One Heart from Breaking

by Emily Dickinson

If I can stop one heart from breaking,
I shall not live in vain;
If I can ease one life the aching,
Or cool one pain,
Or help one fainting robin
Unto his nest again,
I shall not live in vain.

- 1 Look at lines 1 and 2. What does the poet mean by this statement? Do you think it is a big task? Give some examples of how you might be able to carry this out.
- 2 The words 'ease one life the aching' are very old-fashioned English. Use a dictionary to look up any words you need to, and rewrite the phrase in modern English.
- 3 This poem is quite a short list of future possibilities. Write another sentence with the ending 'I shall not live in vain.'
- 4 If you did the things that the poet mentions, would you feel that your life had not been 'in vain'?
- 5 Now write your own poem.

If I _____ (a)
I shall _____ (b)
If I _____ (a)
Or _____ (b)
Or _____ (c)
_____ (d)
I shall _____ (b – same as line 2)

Hard Times

by Charles Dickens

Coketown is an industrial city filled with large, smoking factories. In this grey place, Thomas Gradgrind has opened a school for the children of the factory workers. “They need facts, facts and more facts,” he tells the teacher on a school visit. Mr Gradgrind believes that you can pour facts into a child’s mind in the same way that you can pour oil into a machine: both will work better that way.

Mr Gradgrind’s ideas are shared by a rich man called Mr Bounderby, who owns many of Coketown’s factories as well as the local bank. Mr Bounderby is proud of his successful life because, he tells everyone, “I grew up with nothing, without even a mother to help me”.

One day, Mr Gradgrind is told that a performer from a circus belonging to a man called Mr Sleary has disappeared. Hearing that the performer’s young daughter Sissy is all alone, Mr Gradgrind decides to adopt the girl. Mr Bounderby is not happy that a circus girl will share Mr Gradgrind’s home with his daughter, Louisa and his son, Tom. Mr Bounderby thinks he will marry Louisa one day, and believes that a circus girl could be a bad influence on her. “Louisa should only know facts, but Sissy will have imaginative ideas from the circus,” he complains.

Sissy finds her new life difficult and wonders when her father will return. Louisa feels sorry for the girl, but her brother Tom tells her it is not good to feel emotions.

One day, Mr Bounderby receives a visit from a poor factory worker called Stephen Blackpool. Stephen explains that he is so poor that he cannot afford a wedding for Rachael, the woman he wants to marry. Mr Bounderby sends Stephen away, saying that he cannot help someone who is so poor. As Stephen sadly walks home, he meets an old woman called Mrs Pegler. She tells him that she waits near the bank every few weeks to see Mr Bounderby. She does not say why she does not want Mr Bounderby to see her.

Some years pass before Mr Bounderby asks Louisa to marry him. Mr Gradgrind tells his daughter that it is logical that she should marry Mr Bounderby because he is rich. Louisa reluctantly agrees.

Life is increasingly difficult for the people working in Coketown’s factories. The workers decide to call a strike to protest about their terrible conditions. Stephen Blackpool refuses to join the strike, believing it will make their conditions worse. Because of this, the other strikers refuse to talk to him. When Mr Bounderby hears about the situation, he asks Stephen to spy on the factory workers. Stephen refuses to help Mr Bounderby, who is so angry that he fires him.

70 That evening, Stephen is surprised when
Louisa and Tom visit his poor home. They
tell him they were impressed by the loyalty
he showed his friends. Tom offers to help
Stephen. He asks him to wait outside the
bank for the next three nights, and that
someone will give him some money. But
75 after the third night, no one has come to
help Stephen and he decides to leave the
dirty town.

The next morning, Mr Bounderby finds
out that his bank has been robbed.
80 People report that they had seen Stephen
Blackpool waiting outside the bank at night
and everyone assumes he is the robber.
Louisa, however, suspects her brother
Tom, who is now seriously in debt.

85 Shortly after this, Louisa's mother dies.
Louisa visits her father and seems like a
different person. She tells Mr Gradgrind
that she has been ruined because of the
way he has brought her up. She says
90 she does not want to live like a machine
without emotions. Mr Gradgrind is
shocked to see how unhappy his daughter
has become. He wonders if he has made a
terrible mistake with his children and says
95 that he will try to learn about the emotions
he has never felt.

Meanwhile, Mr Bounderby is determined
to find Stephen Blackpool. Rachael
writes to Stephen asking him to return to
100 Coketown so he can clear his name, but
her fiancé does not return. Sissy spends
time with Rachael each day to comfort
her. One evening, as they are walking past
Mr Bounderby's house, they are surprised
105 to see one of Mr Bounderby's servants
pushing an old woman into his house.
"This old woman won't say why she was
hiding near the bank. I'm sure she helped
with the robbery!" he cries.

110 Mr Bounderby is shocked to see it is Mrs
Pegler and reluctantly admits that she is
his mother. Mrs Pegler had brought him
up well and sent him to a good school, but
when he became rich, he refused to see her
115 again. That is why she visited his bank to
watch him, without being seen: she wanted
to see what had become of her son. Mr
Bounderby confesses that he had not really
grown up in a poor home.

120 The next day, someone hears a noise down
an old disused mine. Rachael is horrified
to discover that Stephen Blackpool had
fallen into the mine on his way back to
Coketown. A rescue team manages to get
125 him out, but he is badly injured. He tells
Louisa that she must speak to Tom about
what happened to clear his name, and then
he dies. It is clear that Tom is the bank
robber.

130 Louisa immediately goes to tell her
father, but they discover that Tom has
disappeared. They learn that he decided
to flee from the police with Mr Sleary's
circus. Louisa, Sissy and Mr Gradgrind
135 travel all night to find the circus, which is
now near Liverpool. When they finally find
Tom, he admits his guilt. Louisa says she
forgives him and they agree to help him
leave the country. Mr Sleary helps Tom on
140 to a ship that is leaving England that night.
Tom escapes and is never seen in England
again.

Back in Coketown, Mr Gradgrind is a
changed man. He decides to devote the
rest of his life to helping the poor. He also
145 writes in the newspaper explaining that
Stephen Blackpool was an innocent man.

Sissy remains with her adopted father
and one day has a family of her own. Her
150 young children grow up full of imaginative
ideas. Louisa helps her to bring them up as
happy, balanced people with a future that is
not only filled with facts.
