LESSON 1A VOCABULARY AND GRAMMAR

1 Read the article and check which forms of communication ...

- make it easier to **stay in touch** nowadays.
- were a good way to quickly **spread the message** that an enemy was coming.
- can **carry a message** over a long distance.
- can be used to **convey a** short and simple **message**.
- could be a good way to **make contact** if you were stuck on a desert island.

Messaging through time...

Since the dawn of time, people ¹ have been using different ways of communicating at a distance. In ancient times, they used smoke signals and after writing developed, they ² invented more ingenious methods of delivering messages; for example, sending a message in a bottle. At the turn of the 20th century, bottles were found which had been sent by people who ³ were travelling on board the Titanic. Happier stories have also come to light. In 1956, Ake Viking, a Swede, tossed a letter into the sea, hoping it would reach his future wife. Two years later, he received a letter from a Sicilian girl, Paolina, who ⁴ had found his bottle and soon after they were married!

The invention of the telegraph in 1837 sped up communication dramatically. A criminal, John Tawell, was caught after he had escaped on the train to London. A telegram was sent to the London police, and they ⁵ were waiting for him when he arrived there.

In Jordan, there are over six million mobile phones in use by the population. But you can still send telegrams through the Jordan Post Company!

Since the invention of the mobile phone and the Internet, the world ⁶ has become a different place. People ⁷ are still sending messages and it usually ⁸ takes only seconds to deliver them. But ⁹ are we now forgetting how to communicate face-to-face? Without a doubt there are some challenges, but there are also examples of when the Internet ¹⁰ has changed someone's life for the better. Look at Tara Taylor's case, a mother who lives in the USA and ¹¹ is often on social media: when she uploaded a photo of her daughter on social media, a friend spotted a problem with one of the child's eyes.

It turned out that the girl had a rare disease, but her sight was saved!

2 Make more collocations with the nouns *contact*, *message* and *touch*, using the verbs from the box. You can use one word twice.

deliver establish lose maintain pass on

1 _____ / _____ / _____ **contact**

2 _____ / _____ **a/the message**

LESSON 2A READING AND VOCABULARY

1 SPEAKING In pairs, discuss the question.

What do you think would happen if we could talk to animals?

2 CRITICAL THINKING Read the article and study Active Reading. What opinions about communication does the author express? How far do you agree with him?

MAKING

CONTACT

By Amer Alhalawani

We know that some animals understand basic instructions, allowing travellers to control their horses or camels, for example. But although some of the more intelligent animals can **figure out** what we want them to do, we have long assumed that communication with – and between – animals must be limited. However, thanks to the work done by the naturalist Jane Goodall since the 1960s, we should take the possibility seriously that some animals can both **take in** what we are saying and **get across** complex ideas.

As a child, Jane loved reading books about a fictional character called Dr Dolittle, who could talk to animals. Perhaps this is what inspired her to go to Africa when she was in her 20s. Here she **came across** a scientist who asked Jane if she might want a job observing chimpanzees in the wild. She immediately said yes. She went with her mother to the shores of Lake Tanganyika in Tanzania to start her new job, and it was not long before she **made out** a group of chimpanzees in the trees around an area now called the Gombe Stream National Park.

How could a young English woman with no scientific training possibly make contact with a group of wild chimpanzees? At first, the animals ran away as soon as they saw her. But maybe because she knew very little about these wild animals, it is highly likely that her calmness gained their trust. It was only later that Jane would learn how dangerous they could be. She saw that different groups of chimpanzees had battles in which they tried to **wipe out** the rival group. But before this, her studies showed her that the chimpanzees could clearly communicate, allowing them to groom and help each other, share food as well as have arguments. Jane **pointed out** that the animals couldn't communicate using language like people, but they could communicate by touch and sound. Amazingly, she also realised they could use sign language.

At this time, people believed that only humans could use tools, but Jane watched chimpanzees using sticks to take ants from a tree, and then used the sticks to feed the ants to their young. Through her work, Jane **spelled out** to the scientific community for the first time that animals, too, could use tools.

Jane went on to write a number of books about her work. As well as explaining chimpanzees' highly developed social behaviour, she taught us that they are omnivores (people used to think they were vegetarian). In 2002, she became a UN Messenger for Peace.

In my opinion, Jane Goodall **brought about** a complete change in the way people understood how animals can communicate. Since her work in Tanzania, naturalists have continued to study different forms of communication between animals such as whales and elephants, who can **pick up** sounds made by other whales and elephants over large distances. I feel that we may well learn even more about animal communication in the future.

GLOSSARY

- groom** – to brush and clean fur
omnivore – a living being that eats plants and animals
rival – a person or group that competes with others

ACTIVE READING | Identifying the author's opinion

In a text, the author presents his/her point of view on a topic and different arguments to support that view.

- Writers often use opinion verbs and phrases to signal their position, e.g. *I feel ...*, *I think ...*, *In my opinion ...*, etc.
- Sometimes they express their views more subtly by using modal verbs, e.g. *We should ...*, *It must be ...*, etc.
- They may also use phrases of probability, e.g. *Maybe ...*, *Possibly ...*, etc.

Remember that you can form your own opinion, rather than uncritically accepting what the author has to say.

3 Read the article again and choose the correct answers.

- 1 According to the author, how did Jane get the chimpanzees to trust her?
 - a She talked to them.
 - b She was relaxed with them.
 - c They did not know she was there.
- 2 What were the two most important discoveries that Jane made?
 - a The chimpanzees could talk and make tools.
 - b The chimpanzees had fights and disciplined their children.
 - c The chimpanzees could use tools and communicate using sign language.
- 3 What does the author believe might happen if humans could talk to animals?
 - a We would change our minds about how animals communicate.
 - b We might learn to communicate like whales and elephants.
 - c They might teach us important lessons.

4 Match the highlighted phrasal verbs from the article with their definitions below.

- 1 to receive sounds, phone signals, etc.
- 2 to cause something to happen
- 3 to tell someone something you think they don't know
- 4 to see something with difficulty
- 5 to destroy something completely
- 6 to successfully communicate a message/ an idea
- 7 to explain something very clearly
- 8 to meet or find something or someone
- 9 to solve or understand something
- 10 to understand and remember something you are told

5 Complete the sentences with the phrasal verbs from the article, in the correct form.

- 1 I was embarrassed when he ____ that I had made some basic spelling mistakes.

- 7 You don't understand? Do I have to ____ what I mean?
- 8 We couldn't use our mobile phones in the desert, but started to ____ signals when we went into the mountains.

- 1 Can you work out the meaning of the title?
- 2 Do you find it easy or difficult to break the ice with people you don't know? Say why.

How to **BREAK THE ICE** and make new friends

Don't worry too much about **making a favourable impression**. Often the best way to **strike up a conversation** is simply to comment on the weather. If you can **have a laugh** about something you're both doing, it can really **create a bond** between you.

People like it if you **pay them a compliment**, but you need to sound sincere. Just **make small talk** about where you live, and so on. You may find that you really **hit it off** and become friends for life.

People are more likely to **take to you** if you **come across as** a warm person. So, make eye contact and smile.

LESSON 7A WRITING | An analytical essay

1 In pairs, answer the questions.

- 1 Do you think computer technology will change the way children communicate in the future? Why?
- 2 Can you think of one positive way and one negative way in which technology might change children's lives?

2 Read one student's answer to the essay question given below and compare it with your ideas from Exercise 1.

Is Artificial Intelligence good or bad for children?

REGULATED AI IS GOOD FOR CHILDREN

Artificial Intelligence (AI) refers to how computers can do tasks that are usually done by intelligent humans. As a result, AI computers can now do amazing things, including writing songs, solving scientific problems and even helping to find cures for diseases. People are also using AI more and more in everyday life and although it might make many aspects of life easier, it could also make things worse, especially for our children.

AI is already used by many forms of social media. As with other forms of social media, AI can learn about its users' interests and hobbies, and that includes children.

According to the website Net Positive, AI can even identify children's voices. This might mean children are directed to online advertising and content that their parents would not want.

However, some countries like Jordan are hoping to use AI sensibly. UNIDO reports that many industries have worked together to create a plan for using AI in the country's development over the next five years.

Jordan is in a good position for using AI as it is at the forefront of technology.

The people looking into using AI in Jordan are hoping it will help in science, investment and government services. However, there is a danger that this increased use of AI could result in problems with online safety if not controlled. Consequently, the government plans to set up regulations to address these dangers and strictly control how it is used.

Of course, some people are worried that students using AI might end up with incorrect work. AI search engines do not always use reliable sources and so information provided by AI might be incomplete or even wrong.

We are still at an early stage in the development of AI and there is no doubt it is an exciting form of technology. However, without careful rules to control how it is used, and who it is used by, there are undoubted problems with it. Children themselves might find they are relying on a form of technology that in its present form should not always be trusted. As *Time* magazine argues in its article in July 2023, 'kids will be the biggest losers.'

LESSON 1A VOCABULARY AND GRAMMAR

1 In pairs, read the definition of 'dystopia' and discuss the question.

Do you enjoy reading books, watching films or playing video games set in a dystopia?

2 Read the magazine article about two different visions of the future. Which text is dystopian?

THE FUTURE'S...

dystopia /dɪs'təʊpiə/

an imaginary place where life is extremely difficult

... BRIGHT

In many ways, human life on this planet is better than it's ever been. In many countries across the world, crime has been dropping steadily. This may be due to better education, or perhaps to a reduction in extreme poverty. In 2018, the proportion of the world's population living in extreme poverty fell to around ten percent. With luck, no one ¹ will be living in this way within a few decades.

10 Technology is also making our lives easier and safer, and this trend is bound to continue. For example, driving is sure to become safer. Human error is the key reason for most car accidents, and well-programmed driverless cars may save huge numbers of lives. Such cars are already a reality and are going to become more common in the next few years.

And finally, life expectancy is already higher than it's ever been and as a result of better medicine, 20 people are likely to live until the age of 100.

... TERRIFYING!

We may have seen some improvement in poverty and crime in recent decades, but why assume that this pattern will continue? I'd argue that for most people life is actually unlikely to get better.

Advances in robotics and artificial intelligence will not only reduce the number of unskilled jobs available, but will also eliminate semi-skilled jobs which can be done by a computer. By 2050, young people ² will have been trying, and failing, to get a job for most of their 'working' lives! In 30 years' time, a few lucky people will be rich and the rest of us will be poor.

35 Within 20 years, we ³ will have stopped fighting over oil – ⁴ we'll be fighting over water instead, as global warming is certain to lead to more water shortages.

Future forms for predictions

- 3 THINK BACK** Look at two predictions from the texts. Which verb form is used when there is some evidence now for the prediction?
- Such cars are already a reality and are going to become more common in the next few years.
 - A few lucky people will be rich and the rest of us will be poor.
- 4 Match the underlined phrases (1-4) in the article to these tenses.**
- Future Perfect Simple
 - Future Perfect Continuous
 - Future Continuous
- 5 Now match tenses a-c in Exercise 4 to explanations 1-3 below.**
- an activity in progress at a specific time in the future
 - an activity which will be completed by a specific time
 - an activity which continues up to a specific point in the future
- 6 Choose the correct answers to complete the sentences.**
- By 2050, software **will be able / will have been able** to predict traffic jams.
 - In a few years, tablets won't exist anymore. They **will be / will have been** replaced by smartwatches.
 - By the time today's young people retire, they **will be working / will have been working** for 70 years.
 - I don't think we **will need / are going to need** passwords, as computers will be able to recognise our faces.
 - In a few decades, everyone **will be growing / will have been growing** their own food.

We will also need to produce more food and it ³ _____ that we will be able to produce enough meat to feed all those people without further damaging the environment. Our eating habits ⁴ _____ change.

Luckily, scientists are already working on alternatives to meat, such as insects and synthetic protein. It may sound disgusting, but in a few years, all of us ⁵ _____ it!

3 **PRONUNCIATION** Read the compound nouns in Exercise 2 aloud. Is the stress on the first or the second word for each compound noun? Underline the correct word.

4 2.2 Study Active Vocabulary. Then listen again and check your answers to Exercise 3. Practise saying the compound nouns.

ACTIVE VOCABULARY | Compound nouns

- A compound noun is made up of two words. Usually the first part of the compound tells us the type or purpose of the second noun, e.g. *climate change* (*climate* tells us what type of change we are talking about).

- The first word can be a noun, adjective or a verb, but the second word is always a noun, e.g. *climate change* (N + N), *industrial waste* (A + N), *swimming pool* (V + N).
- When both words are nouns, the stress is always on the first noun, e.g. **climate** change. When the first word is an adjective or a verb, the stress is on the second word, e.g. industrial **waste**.

5 Complete the sentences with compound nouns from Exercise 2.

- 80 percent of the energy we consume is provided by _____ which pollute the atmosphere.
- Deforestation causes _____ because tree roots are no longer in place to bind the earth together.
- It is claimed that _____ from cars kill twice as many people as accidents caused by vehicles.
- Up to 300 homes can be powered by one _____, using _____.
- _____ is the greatest threat to _____ which are close to extinction.
- For safety reasons, _____ must be stored in sealed containers underground.
- _____ damages buildings, forests, and kills fish.

6 **REFLECT | Culture** In small groups, make a list of at least three environmental issues for each of the categories below.

- The most urgent issues to deal with.
- Ideas for how people could easily change their behaviour.
- The issues that most affect you.

7 Choose one category from Exercise 6 and present your choices to the class.

- When you give your presentation, give reasons for your answers and say what actions people could take.
- When you listen to presentations, make notes and ask questions at the end.

Now go to Workbook page 14 for the next lesson.

1 **SPEAKING** In pairs, look at the photos and make a list of weather-related vocabulary to describe them. Which of the types of weather have you seen?

2 **Make more weather-related collocations, using the nouns from the box.**

floods heat humidity rain snow temperatures weather winds

- 1 blistering _____
- 2 freak _____ / _____ / _____ / _____
- 3 gale-force _____
- 4 heavy _____ / _____
- 5 high _____ / _____
- 6 scorching _____ / _____ / _____
- 7 soaring _____
- 8 sub-zero _____
- 9 torrential _____

3 **In groups, discuss the questions.**

- 1 What problems do such weather conditions cause?
- 2 Look at some arguments people make about climate change. Do you think there is any truth in them?
 - The temperature is actually cooling rather than heating up.
 - Climate change is not being caused by human beings.

4 **2.4** Listen to a lecture about climate change. Does the speaker agree with any of the arguments in Exercise 3?

5 **Study Active Listening. Then match the signposting phrases to the functions.**

- 1 I'm going to be talking about ...
- 2 In other words, ...

- 4 ... whereas ...
- 5 So, to sum up, ...

6 **2.4** Listen again and complete the notes with up to three words in each gap.

- 1 The percentage of scientists who believe that climate change is real is about _____.
- 2 To understand changes to climate, it is necessary to look at the _____ rather than the current weather.
- 3 It is possible that warmer weather may actually cause more _____.
- 4 In the past, temperature changes were gradual and caused by natural factors such as solar activity and _____.
- 5 While carbon dioxide may help plants to grow, it also causes freak weather which destroys _____.

7 **REFLECT | Society** Discuss the questions.

- 1 Is climate change something that you worry about? Say why.
- 2 What do you think individuals can do to make a difference?

Now go to Workbook page 15 for the next lesson.

LESSON 4A READING AND VOCABULARY

- 1 In pairs, look at the photos on the right. What do you think all these creatures have in common?
- 2 Read the article quickly and find two things the creatures have in common.

the blobfish

THEY NEED SAVING TOO!

2.9

A It's no accident that the symbol of the World Wide Fund for Nature is a giant panda. These animals are cute or beautiful, or both, and of course we all want to save them. This popularity enables organisations such as the WWF to raise money to support a range of critically endangered species. However, less well-known or 'exciting' creatures are far more likely to become extinct because they don't get enough attention from researchers. **Invertebrates** (animals without a **backbone**) make up over 90% of all the creatures on Earth, but get only a tiny percentage of the money available to protect our wildlife.

B And what about those creatures that many people would find positively ugly? With its tiny eyes, big mouth and **slimy** pink body, the blobfish is far from attractive. This **marine** creature lives deep in the ocean, where the pressure is very high. As a result, it has tiny **fins** and no **skeleton**, which keeps it from being crushed by the water pressure. Unfortunately, when fishing boats sweep the ocean floor, looking for other fish and **crustaceans**, these fish can get swept into the nets accidentally.

C The threat faced by the pangolin, however, is far from accidental. They are more often targeted by poachers than any other animal in the world. Unique among **mammals**, it is covered in **scales**, like a **reptile**. They may not look very **cuddly** or cute, but these scales are highly prized in traditional Chinese medicine, which has caused the population of pangolins in China to fall by around 90% since the 1960s. Their scales protect them from their natural predators, but it's simple for a poacher to just pick them up.

D Other creatures become endangered precisely because people find them ugly. Take the aye aye for example. Found only on the island of Madagascar, the aye aye is the world's largest **nocturnal primate**. During the day they sleep in nests in the trees, coming out to hunt at night. They are **solitary** creatures, **furry**, and harmless but unfortunately, they are often killed.

the pangolin

GLOSSARY

- 1 tell us what kind of creatures get the least funding in terms of research and preservation?
- 2 tell us about a creature whose body is perceived as useful by some humans?
- 3 explain how a creature's physical features protect it from an extreme environment?
- 4 explain why wildlife conservation institutions often choose certain animals to represent them?
- 5 describe an animal that is very different from others in its class?

4 Write the highlighted words from the article under the correct heading.

2 Read Farid's email to Customer Service. What problem does he describe and what three solutions does he suggest?

3 Read the email again. Do you think that the problems and solutions the writer describes are likely to persuade the reader that something should be done?

From: Farid Asmar
To: Customer Service
Subject: Reduce plastic!

yesterday at 8.13 p.m.

Dear Sir or Madam,

^A I am writing to draw your attention to a pressing problem to which your stores are contributing significantly by their use of non-biodegradable plastic packaging.

Like many others, ^B I am deeply concerned by the huge quantity of plastic used to package items which simply do not require it. We are told that since the 1950s the world has produced more than eight billion tonnes of plastic, of which around 80 percent has been thrown into a landfill or left as waste in the general environment. ^C It is essential that we all take immediate action to prevent this.

Much of this plastic is a result of unnecessary packaging. It is vital that this is reduced as much as possible. Some supermarkets have managed to cut the amount of plastic packaging by using sustainable cardboard instead of plastic, or simply by removing unnecessary plastic from tissue boxes, pizza boxes and other items. I would ask you to investigate alternative forms of packaging for your products as a matter of urgency.

In the meantime, perhaps the quickest way to start to tackle this problem would be to sell fruit and vegetables without any extra packaging, creating a plastic-free aisle, where customers could use paper bags or their own reusable containers. Around a third of consumers say that they base their buying decisions on ethical practices, so providing an opportunity to buy fruit and vegetables plastic-free could help you to win over a large number of new customers.

^P I urge you to consider these possible solutions very seriously, and do everything in your power to reduce the amount of plastic you use in packaging, to protect the planet.

I look forward to your response.

Yours faithfully,

Farid Asmar

LIFE SKILLS | How to give a persuasive presentation (2)

Using rhetorical devices

Rhetorical devices are techniques used by a speaker to make their language or arguments more persuasive or convincing.

Emotion

People tend to respond to emotional language, or an appeal to their emotions.

Rhetorical questions

A rhetorical question is asked to make a point, rather than to get an answer.

Quotations

A well-selected quotation from a famous person can give your argument more weight.

Repetition

The repetition of a particular word or phrase, usually something which carries a key meaning.

Tripling

People seem to respond to information in threes, so speeches often list three similar things, or make three similar points.

LESSON 1A VOCABULARY AND GRAMMAR

1 In pairs, ask and answer the questions.

- 1 Look at the photos. What are the benefits of being from a small/large family?
- 2 What do you think are the good and bad things about being an only child?

2 **THINK BACK** Look at the phrases describing ways of behaving towards other people. Are these positive or negative things to do? Can you add any other phrases?

empathise with somebody
 fall out with somebody

 make up with somebody
 put up with somebody/something
 talk behind somebody's back

3 Match the definitions 1–9 with the phrases for ways of behaving from the box.

be the peacemaker
 blow things out of proportion
 burst into tears have a go at somebody
 make a fuss of somebody
 mess about show off
 tell somebody off wind somebody up

- 1 to say things in order to annoy somebody

4 **SPEAKING** In pairs, talk about how you get on with members of your family. Do you think being the oldest, youngest or middle child, or an only child, affects your personality?

5 Read the short texts. Which one describes an only or oldest child, a middle child and a youngest child? Go to page 74 to check your ideas.

A When I was little, my parents were forever telling me off about the things I'd done. I was quite naughty and I used to mess about from time to time, sure. I mean, there was one time when I dressed up in my dad's clothes and went down the High Street pretending to be him! It was hilarious, but my parents didn't get the joke. They took it way too seriously and blew it completely out of proportion. I really wasn't that bad as a child!

B My brother is always showing off. I'm not sure he even realises he's doing it. He'll go on and on about how great he's doing at school, and everyone always makes a big fuss of him. It really winds me up, but if I say anything, my parents tell me I'm being jealous. It's not fair.

C My brother gets attention for being great at school, and my sister is the clown of the family. Me? I'm not really sure what my role is. I'm certainly the peacemaker when my brother and sister argue. They're really loud and emotional, whereas I tend to keep my emotions to myself, really. I don't burst into tears easily or start shouting.

LESSON 4A READING AND VOCABULARY

1 **SPEAKING** In pairs, look at the cover of a book. Do you know this story? If not, what do you think it is about?

2 Read the summary of *Oliver Twist* and answer the questions below.

- 1 What kinds of people lived in a workhouse?
- 2 Why did Oliver decide to walk to London?
- 3 Why do you think Fagin and Mr Sikes used children to take things from people?

3.11

In England during the 1800s, many people came to the cities to work. There were places called workhouses where the poorest people could live, work and eat to **make ends meet**. But life in the workhouses was not easy, where people somehow managed a **subsistence, living day-to-day, huddled together** to keep warm.

One night, a woman arrived at a workhouse. She gave birth to a baby but then sadly died. A nurse called the baby Oliver Twist and he was sent to a house for orphans until he was nine. Then he was sent to a workhouse to work. Oliver was sad to leave the other orphans.

10 Although the boys lived **hand-to-mouth**, they had a **sense of belonging** at the house and looked after each other.

At the workhouse, all the other boys were as **malnourished** as Oliver. One day, they encouraged Oliver to **beg** for more food, but this made the managers of the workhouse angry.

15 Oliver decided to escape to London but had no food and **went hungry** for days, before he met another boy called Jack Dawkins. He showed Oliver the way to the city. Jack introduced Oliver to an old man called Fagin, who gave Oliver some food and a bed to sleep on. The next day, Oliver saw many other boys come to Fagin's house. The boys **gathered together** to give the old man watches and jewellery. Fagin then told Oliver to go into the streets with the other boys and learn from them. Oliver was shocked when he saw the boys take things from people's pockets. He understood that they were thieves!

GLOSSARY

housekeeper – a person whose job is to look after a house

orphan – a child whose parents have died

Suddenly, a man saw the boys take a
 25 handkerchief from his pocket. He shouted at
 the boys, and as they ran away, a police officer
 tried to arrest Oliver. But a man, Mr Brownlow,
 told the police officer that Oliver had not taken
 anything. Mr Brownlow was worried about the
 30 **skinny** boy and took him back to his house,
 where the housekeeper looked after Oliver.

When Oliver was better, he was walking
 along the streets when a woman grabbed
 him. She took him back to Fagin's. Fagin then
 35 asked Oliver to help Mr Sikes with a job in the
 country. They told Oliver to climb through a
 small window of a house. When he did so, he
 was shot.

Luckily, he survived. When he was better, he
 40 was taken to Mr Brownlow, and was made
 to **feel at home**. Mr Brownlow explained that
 Oliver's mother was a rich woman. But his
 brother, a man called Monks, knew that Oliver
 would only get the money if Oliver was an
 45 honest person. So he watched Oliver and
 made sure that he met Jack Dawkins, and
 then Fagin. In this way, Oliver would never be
 honest and Monks could keep all the money.

At the end of the story, Monks gives Oliver
 50 the money that is owed to him and leaves the
 country. Oliver is adopted by Mr Brownlow,
 which shows what a kind man he is.

3 Read the text again and choose the correct answers.

- 1 Why was Oliver sad to leave the house for orphans?
 - a It was where he was born.

- 3 Why did Oliver's brother Monks want Oliver to be a thief?
 - a He could get watches and jewellery from him.
 - b He was an honest person.

Some people think that families are not as close as they used to be. Do you agree? Write about ...

- mobile technology
- changes in working life
- your own ideas

ARE FAMILIES AS CLOSE AS THEY USED TO BE?

Many people today feel that relationships between members of the same family are not as close as they were a few generations ago. Changes in our working lives and the advent of technology have certainly altered how families interact, but I would argue that families generally remain as close as they ever were.

5 Increasingly, parents are seeking a greater work-life balance. This means that even in a family where both parents work, they are often able to ensure that at least one parent is available to take their children to after-school activities or to attend shows and concerts at the school. A better work-life balance also enables families to spend more quality time together.

10 It is commonly accepted that the time needed to run a household has also decreased over the last few decades as more and more labour-saving devices have been invented. A striking example of this is the humble washing machine, which Hans Rosling, a well-known Swedish statistician, called 'the greatest invention of the industrial revolution' because of the way that it liberated parents to spend more time with their children. Prior to its invention, it was usual to spend an entire day doing laundry.

15 Going online can be seen as a way of bringing families together as well as a distraction. Whereas in the past family members living apart would have to write letters and often wait a long time for a reply, nowadays there are many more ways to keep in touch, such as social media and video calls. Overall, I believe that family members do communicate with each other more than in the past, whether through technology or face-to-face.

20 In conclusion, I would say that while society may have changed, families remain as close as they were, aided by technology and greater flexibility in working patterns.

A collocation is a combination of two or more words, e.g. *disprove a theory*

The most common structures for collocations are:

- adjective + noun, e.g. *a bizarre theory*
- verb + noun, e.g. *reveal the truth*
- adverb + adjective, e.g. *potentially embarrassing*
- verb + adverb, e.g. *discuss calmly*

Meet two readers who have had experiences with extreme weather

Take Shelley, who lived on the island of Vanuatu. The people in her village knew a large cyclone was heading their way. The villagers decided to take shelter in one house, but in no way could they imagine how strong the cyclone would be. When the wind got stronger, they told the children to hide under the beds and under no circumstances should they come out. But as the storm was passing over their house, it took the roof off and soon their room was full of flying objects. No sooner had they huddled together in the basement than the wind blew a hole into the basement. Luckily, they were able to survive until the storm passed.

Noura's family were lucky to win a holiday in Wadi Rum, where they were taught traditional techniques to survive in the extreme weather conditions of the desert from a local Bedouin guide. The guide showed Noura how to find her way using the sun or the stars. She found out that wearing long black clothes can help people stay cool in extreme heat. The family found out about where to find water in the desert. Little did they imagine how much was growing there. They realised how full of plants the desert really was.

Negative inversion

2 Look at sentences a–b from the article and answer questions 1–2. Then study the box and check. Find more examples of negative adverbials in the text.

a No sooner had they huddled together in the basement than the wind blew a hole in the basement.

b Little did they imagine how much was growing there.

1 What do you notice about the word order after the negative adverbials?

2 What effect does using negative adverbial phrases like these have on the reader?

Negative inversion

We use **negative inversion** to add emphasis to a sentence. After a negative adverb or phrase the word order changes: I had never felt so afraid. → **Never had I felt** so afraid.

Some common adverbs and adverbial phrases:

- hardly/barely/scarcely ... when ...
- seldom
- never/at no time
- under no circumstances/in no way
- no sooner
- not only ... but also ...
- little (did I/they know/imagine ...)

4 He didn't imagine that his friend was a spy! Little _____.

4  **4.4 Listen and write the sentences. Then rewrite each of them using a negative adverbial.**

5 SPEAKING In pairs, look at the sentences you wrote in Exercise 3. Imagine each one is part of a different news story. What could each news story be about?

Now go to Workbook page 31 for the next lesson.

I can use negative inversion to add emphasis.

LESSON 4A READING AND VOCABULARY

1 In pairs, look at the photos from two news reports. What do you think the reports are about?

2 Read the news reports and answer the questions.

- 1 What opportunities does the development bring according to the first report?
- 2 What other things will be built as well as the hotel?
- 3 Why does the second report think the development won't be good?
- 4 What do the protesters want to happen?

NEW HOTEL, BUT NO NEW HOPE FOR LOCALS

NEW HOTEL IS JUST WHAT THE AREA NEEDS

4.5

When developers released a statement that they were going to build a luxury new hotel at the local beach, everyone in the town was very excited. ¹ _____.

- 5 We all have to seize the opportunity and realise that the hotel will not only give us work, but offer improvements to the whole area around the beach. The developers have promised a new road with wide pavements to and from the beach and a replacement of the sad old beach restaurants which have been there for years.

We have asked for such development for years and I'm so happy that the developers have come up with a solution to help local people. ² _____.

I was very surprised to hear that there are protesters who are against the plan. Just last week, some activists tried to stop lorries from entering the beach to start building work, and I reported the incident to the police. ³ _____.

There has even been an accusation that I am 'working to promote the hotel company', but this is not true.

We must remember that the hotel will solve many of the problems in our area, and I support it 100%.

When we first received information about a new hotel at our local beach, many local people were pleased and thought that the development could give us job security. ⁴ _____. It is very clear that the hotel is an international company and in all its branches, it employs an international staff. It also uses the same building contractors for all its hotels, and none of them are from our area.

In addition, the developers plan to replace the traditional restaurants which have been on the beach for years with new, upmarket restaurants, also with their own staff. These restaurants will be too expensive for most people in our neighbourhood. ⁵ _____.

40 My investigation also revealed a plan to build several new roads to the beach which will affect bird and animal life in a sensitive nature area. I am not an activist and I refute the allegation that I tried to obstruct building work last week. ⁶ _____. I plan to join the other protesters who want a suspension of the building work until we know exactly how many jobs will go to local people. Tension will also continue until the plans for new roads are moved away from the sensitive nature areas.

3 Read the reports again. Match sentences A–H with gaps 1–6 in the texts. There are two extra sentences.

- A** However, people should have the freedom to protest about things they do not agree with.
- B** Everyone has the right to protest, but such obstruction is illegal.
- C** There have been talks for years about opportunities for new developments, but they never seem to happen.
- D** People were furious and took to the streets in protest.
- E** I am also sure that locals who work at the old restaurants will probably lose their jobs.
- F** Not only will the hotel need local workers but there are sure to be other jobs in tourism when the hotel guests start to arrive.
- G** But when I put in a request to find out more about the developers on the internet, I quickly changed my mind.
- H** She stressed it was ridiculous to believe the residents could be guilty of harming the workers.

4 CRITICAL THINKING Study Active Reading. Then read the news reports again and find examples which demonstrate bias. Why is it important to recognise bias?

ACTIVE READING | Recognising bias

Very few texts are completely balanced or objective, but there are some key indicators that a text is more strongly biased:

- facts are missing or exaggerated
- there are overgeneralisations
- there is little respect for different opinions
- there are quotation marks to indicate that the writer does not agree with a different opinion.

5 Find examples of nouns in the news reports with the suffixes in the table.

Suffixes	Nouns
-ment	<i>statement, ...</i>
-tion	<i>information, ...</i>
-sion/-cion	<i>tension, ...</i>
-ist	
-er/-or	<i>worker, ...</i>
-ity	<i>opportunity, ...</i>
-hood	
-dom	

6 Complete the sentences with the correct noun forms of the words from the box.

allege improve replace solve

- The two sides need to sit down and find a(n) _____.
- It will be difficult to find a suitable _____ for Laila when she leaves her post.
- The _____ against him are shocking, but he denies all of them.
- There has been a(n) _____ in the standard of living in my country.

6 **4.9** Plan an anecdote that could become an urban myth. Then tell your anecdote in pairs. Are there any true parts in your partner's story?

1 Work in pairs. Read the story. What do you think happens at the end?

The man in black

'Hey, stop!' he **yelled**. ^a I turned round and saw the man in black. I could see that he was running towards an old lady. She was probably about 75, walking slowly with a leather handbag. He probably thought it would be very easy to take something from a person like that. ^b My heart was **pounding** furiously in my chest as the man **raced** towards her. I thought I knew what he planned to do.

^c The day had started so well. ^d I had been **wandering** aimlessly around the city, taking photographs, stopping occasionally for an ice cream or a coffee, without a care in the world.

I first **spotted** him walking along the beach. He looked out of place among the families and young couples. ^e He was wearing a black suit and tie with dark glasses, and looked typical of a bad guy in films. He was **muttering** into a phone.

I watched him as he sat down on a bench. He **peered** curiously at me as I walked past him, but his attention was soon distracted by another call on his phone.

^f The old woman **glanced** at the man and stopped as she was walking past. 'Stop!' He **bellowed** again. Then, he grabbed her by the arm.

2 Now, read the last paragraph and check your predictions.

At that moment, I saw something falling from the sky. A crane from a building site across the road was toppling over some bricks. No sooner had the man pulled the woman away that the crane crashed to the ground where she had been standing! Shame flooded through me. I had thought he was a criminal, but in fact he was a hero who had saved her!

3 Study the Writing box and find examples of: negative inversion, different verbs to describe speaking, looking and moving.

WRITING | A story

Title

Give your story a catchy/interesting title.

Structure

You could try starting the story in the middle of the action for dramatic effect.

Language

- Use a variety of language/tenses.
- Use time expressions to sequence events, e.g. **before**, **after**, **first**.
- Use direct speech to make your story more interesting, e.g. **'Hey! Stop!' he yelled**.
- Use negative inversion to add emphasis, e.g. **No sooner had ...**

4 Read underlined sentences a-f in the story. Which past tenses are used in each example?

5 Now match sentences a-f in the story with functions 1-5 below.

- Describing an ongoing action that forms the background to a story.
- Contrasting an event in progress with a single action that interrupts it.
- Describing an action which was completed before a time in the past.

WATCH OUT!

Positions for adverbs within a clause:

- At the end of a clause (for adverbs of manner, place and time), e.g. *I ran away **quickly**. / I'm sitting **here**. / I've been waiting **for ages**.*
 - Before the main verb (adverbs of manner can go in this position), e.g. *I **quickly** ran away.*
 - At the beginning of a clause to add emphasis (adverbs of place and time can go in this position), e.g. ***With my back to the wall**, I waited.*
- If all three types of adverb are used in the same clause, the order is:
manner → place → time
*I drove **aimlessly** **around the city** **for hours**.*

2 Read some advice on a student Debating Club website on how to be good at debating. Choose the piece of advice you find most useful. Compare your ideas with a partner.

Are you ready for the Roundhills Debating Club meeting next Thursday?

In case you are still working on your talks, we've asked our last month's debate champions to give some tips.

A Issa

If you want to be good at debating, you have to learn to put your personal views to one side. It doesn't really matter what you personally believe, you have to stay objective. It's fine to be passionate and try to get people on your side, but that isn't the same thing as being aggressive or bursting into tears.

B Noura

You have to be flexible, because you might have to argue for something you don't even agree with. It's a good idea just to try and come up with lots of different arguments to begin with. Then you can start to analyse them and see if they really are strong arguments or not. A good tip is to avoid any statements that are too extreme. As soon as you find yourself using language such as 'always' or 'never', it's a clue that your argument might not actually be that strong.

C Muneer

Preparation is really important. Take some time to think through all your arguments really well. Do you have any evidence to support what you're saying? Think of some good examples you can give; it can be hard to think of these on the spot. Are you sure that the point you want to make is really relevant or logical? Be sure that your opponent can't easily find flaws in what you're saying.

- 3 Study the Life Skills box and match tips 1-6 with texts A-C.

LIFE SKILLS | How to be good at debating

- 1 Think of lots of possible arguments to support your statement.
- 2 Analyse the arguments to see how strong they are, and adapt them as needed.
- 3 Back up your arguments with good reasons and examples or research.
- 4 Make your arguments persuasive, but avoid being overly emotional.
- 5 Keep your points relevant.
- 6 Don't exaggerate or make wild claims.

- 4 Read the statement below and the counterargument to it. Which do you agree with most? Say why.

Statement: There is too much violence, crime and war shown on television news.

Counterargument: The use of such footage is justified. People need to see exactly what is going on in the world.

- 5 4.11 Listen to two students starting to debate on the topic from Exercise 4. Match arguments a-f below to each speaker, in the order they are mentioned.

Speaker 1 1 2 3

Speaker 2 1 2 3

- a Watching violence on TV creates more violence.
- b There is little research evidence to back up: watching violence makes you aggressive.
- c Watching war, crime and violence on TV news has a negative impact on our emotions.
- d People have always been interested in violence, e.g. Shakespeare's plays.
- e The speaker doesn't enjoy watching violence.
- f Watching upsetting news items can make people care more, not less.

- 6 4.11 Study the Speaking box. Listen again and complete the phrases.

SPEAKING | Supporting your arguments in a debate

Explaining why your argument is valid

It is ¹ _____ to realise that ... / The crucial ² _____ is that ... / It is clearly the ³ _____ that ... / I would argue that ...

Referring to research/statistics

In ⁴ _____ of this, I could point to ... / There is some ⁵ _____ that ... / According to ...

Giving examples to back up your argument

It is easy to think of many instances of this in daily life. For instance, ... / There have been ⁶ _____ cases where this has happened ...

Summarising/Linking your argument to what has already been said

So, as we have seen ... therefore we must ⁷ _____ that ... / This clearly ⁸ _____ everything I have said up until this point.

- 7 Work in pairs. Make a list of arguments for and against the statement.

Teenagers should share the responsibility for running the household with their parents.

- 8 Do the task below.

LIFE SKILLS | Project

- With your partner, analyse your arguments and find the best two.
- In each pair, Student A presents the first argument.
- Then Student B in each pair presents the second argument.
- Listen to the arguments of another pair and think of some counterarguments.

SABRIYE TENBERKEN

An amazing woman

5.7

German-born Sabriye Tenberken became blind at the age of 12. Life was not easy for her at her first school. She was desperate to fit in, but other children were often cruel to her and her teachers did not understand her needs.

¹ She often tried to hide her blindness until she went to a special boarding school for the blind. Here she realised that blind people were capable of doing the same things as everyone else. ² The school taught her to come to terms with being blind. She learnt various sports including horse riding and she also learnt how to read Braille. She quickly grew in confidence.

She later studied Tibetan at Bonn University. She learnt that many Tibetan people had problems with their eyesight, partly because of their diet but mainly because of the damaging sun at high altitudes. ³ There was no Braille in Tibetan, so she decided to write a Tibetan Braille system. At first, she did this to help her with her own studies, but then she realised its potential to help people in the mountainous region of China.

She had always wanted to go to Tibet and when she was 26 she decided to pursue her dream and visit the country to introduce her Braille system to local people.

Sabriye teaching in her school for visually impaired children in Lhasa.

Although she travelled with two Tibetans, it was tough for Sabriye to travel around rural parts of Tibet, but that did not put her off. Many people did not believe she was blind because she travelled by horse, and she was shocked to find how blind children were treated. Some were never allowed outside because their parents believed they would hurt themselves. So, she became determined to help them and word was quickly spread about the blind woman who also wanted to set up a school for the blind.

“ A lot of people say I can’t do it because I’m blind. ”

Sabriye later met Paul Kronenberg, who became her business partner. ⁴ Together they set up a school, called Braille Without Borders. It has a vision to help blind children to adjust to their blindness and to learn many of the same skills that she had learnt as a girl.

⁵ Sabriye realised that blindness has given her the opportunity to help people like herself. Her work has become famous and ⁵ she was even nominated for the Nobel Peace Prize in 2005. She has also won awards for her work and has also written a book called *My Path Leads to Tibet* about her life and work.

2 Read the article again and answer the questions.

- 1 How did her classmates treat her before she changed schools?
- 2 Why was it difficult for Sabriye to read Tibetan texts when she first went to university?
- 3 What is the main reason for the high incidence of blindness in Tibet?
- 4 Why did some Tibetans keep blind children inside?
- 5 How does the school founded by Sabriye and Paul help children?

3 CRITICAL THINKING Study Active Reading. Then look at the statements below and decide if they are true or false. Find the matching underlined sections in the text (1–5) and explain why you think the information is implied.

- 1 Sabriye used to feel ashamed of being blind. *We can make a guess that this sentence is true, because it says 'She often tried to hide her blindness'.*
- 2 She felt better when she changed schools because she no longer felt isolated.
- 3 While at university, Sabriye wanted to study the Tibetan language but wasn't able to.
- 4 Sabriye founded Braille Without Borders on her own.
- 5 Sabriye won the Nobel Peace Prize.

ACTIVE READING | Making inferences

Sometimes writers do not state information directly. You can work out the missing information by making guesses or inferences. Inferences are made based on clues in the text and on our background knowledge and experience.

4 SPEAKING In pairs, discuss the question.

Do you agree with Sabriye's philosophy that 'it's a blessing not to have too many options in life'? Give reasons for your answer.

5 Look at the highlighted words in the article and discuss what other meanings each word could have in a different context. Then complete the pairs of sentences.

- 1 a He did it in a moment of ____ panic.
b She trains guide dogs for the ____.
- 2 a I would like to ____ a career in journalism.
b The police didn't ____ the speeding car as it was going too fast.
- 3 a The new head teacher explained her ____ for the future of the school.
b Cats have very good night ____.
- 4 a Her accident ____ her ____ riding horses.
b He ____ his degree for a year.
- 5 a She ____ her ambition of becoming a pilot.
b She ____ no one was listening.
- 6 a He found the exam very ____.
b She's a very ____ person. She isn't easily defeated.

6 Complete the sentences with the correct prepositions from the box.

The Jordan Museum

review by Osama Aljabari

I happened to come across this gem of a museum last week on a family trip to Jordan, so we decided to check it out. I'm so glad we did as it turned out to be a hugely enjoyable experience.

The museum opened recently in the Ras al-'Ayn district of Amman, near the Citadel, and tells the story of Jordan through history. It's in a very beautiful building too, a combination of stone (reflecting the past) and glass (reflecting Jordan's present and future).

The large permanent collection starts off with a look at what the country was like in the Stone Age, some 1.5 million years ago. You can then move on to different galleries that take you through Jordan's history in chronological order, with a look at more than 2,000 artifacts covering the Romans, Nabatean history and much more.

What I really liked was the only copper Dead Sea scrolls, which is totally mind-blowing. Another highlight is one of the world's oldest human statues, dating back to 7500 BCE.

The extremely varied themes of the museum include food production, the development of visual arts and architecture, international trade and communication, and the growth of industry. These are explained using modern graphics and interactive displays which are absolutely fascinating.

I was also impressed by the special children's area where children can take part in interactive exhibits and even take part in performing arts activities inspired by the museum's exhibits.

My only criticism of the museum is that the experience just went by too fast. I really enjoyed all the exhibits, but would love to have been able to see and experience even more.

Despite that, I'd definitely recommend going to the museum if you are in Amman because not only is it informative and educational, but it's also a lot of fun. And if this was not enough, there is also a pretty amazing gift shop and café!

3 Complete the gaps in the Writing box with examples from Osama's review.

Not of an age, but for *all* time. – Ben Jonson

Shakespeare died over 400 years ago, but today his plays and sonnets are still studied by over half the students in the world. The playwright's influence is everywhere.

5 Let's have a quick look at modern culture. Shakespeare's plays have influenced the plots of famous novels like Aldous Huxley's *Brave New World* and films like *Ten Things I Hate About You*.

10 6 Hamlet's 'to be or not to be' is as valid today as it has ever been. 9

All of Shakespeare's works have led to a variety of interpretations and adaptations which have impacted our lives in various ways.

15 There is a magic about Shakespeare's plays and characters that reaches out across the centuries. And that's because he dealt with the issue: what it means to be human. His plays feature universal themes
20 and emotions, and the questions he poses engage people from century to century all over the world. Shakespeare's plays mirror our society today and the messages are still relevant. That is why they can be performed
25 in a multitude of different ways and places – Macbeth can be the Scottish King, or he can be a police inspector. Romeo and Juliet can be children of feuding families, or
30 members of different groups in the streets of New York.

The questions Shakespeare asks in his plays are just that – questions. He leaves it to us, his audiences, to discuss and find our own responses. This is another way
35 Shakespeare has influenced education today. Looking at Shakespeare's plays and analysing the motivation of the protagonists can help students develop critical thinking skills. By questioning our assumptions and
40 beliefs we become better thinkers.

Shakespeare also had other significant impacts on our culture. It was his work that helped redefine modern theatre. He interacted with people from all backgrounds
45 and classes and his staging of plays brought theatre to the general public. His plots also helped modern cinematic techniques develop; familiarity with the storylines of Shakespeare's plays allowed early cinema
50 pioneers to experiment with silent movies. In addition to this, Shakespeare shaped what we know about history and historical figures. Furthermore, the questions he raised about people's thought processes
55 and behaviour prompted early investigations into psychoanalysis. Last but not least, of course, one of Shakespeare's major influences was on the English language itself. He added a huge amount of
60 vocabulary to enrich the English language so every day English speakers unthinkingly use Shakespearean words or phrases. He was also famous for his sonnets (a type of poem with 14 lines), a rhythm called a metre and a
65 specific rhyme scheme.

1 What do you know about Emily Brontë? What did she write?

2 Read Extract 1. Describe the characters in the extract.

Extract 1

While Catherine was out of the room, Ellen Dean spoke to Mr Edgar Linton. She felt that she should warn her master that Heathcliff had returned. 'What? That gypsy!' he said. 'Why didn't you warn my wife Catherine?' 'Do not call Heathcliff names, sir,' Ellen replied. 'Mrs Linton would be very upset to hear you. It nearly broke her heart when he went away.' Just then Catherine came into the room. 'Edgar,' she cried, 'Edgar, my love, Heathcliff has come back.' Catherine was very excited. 'Where have you been, Heathcliff? What have you been doing?' she asked. 'I have been in the army for three years and made some money,' he answered. And Heathcliff certainly looked stronger than when he had left Wuthering Heights. His speech, his manners and his clothes were also greatly improved. He had spent his time well.

3 Read Extract 2. In what ways has Heathcliff changed?

Extract 2

Mr Lockwood's story

LS1.1

In November 1801 I decided to leave London and move to the country. I went up to the north of England and visited a house on the Yorkshire moors. I arranged to visit the owner of Thrushcross Grange, a man called Heathcliff.

Heathcliff and I had hardly spoken on my first visit. I had not stayed long because he was rude. But I was interested in getting to know the man, so I decided to go back to Wuthering Heights the next day.

I knocked on the front door but there was no answer.

Then a boy opened the door. The boy was almost as rude as his master was on my first visit. 'This way,' he said, without looking at me. The boy led me to the living room, where a young woman was sitting in front of the fire. Heathcliff entered the room at that moment.

He was covered in snow. 'I wonder if I may stay here for a short time, sir,' I asked. 'I will leave when it stops snowing.' 'It won't stop,' Heathcliff replied impatiently. 'The weather won't change, and you'll never find your way back across the moors in this snow.' Just then the boy came into the room again. He spoke to the young girl. 'Are you going to make the tea?' he asked. The girl pointed in my direction and said to Heathcliff, 'Is he going to have tea?' 'Get it ready,' he said angrily. I understood that I was not a welcome guest.

4 Read Extract 2 again and answer the questions.

- 1 Which character appears in both extracts?
- 2 In what ways are the people at Wuthering Heights rude to Mr Lockwood?
- 3 Why can't Lockwood go back to Thrushcross Grange?

5 In small groups, discuss the meaning of the following phrases from the extracts.

- 1 Do not call Heathcliff names.
- 2 It nearly broke her heart when he went away.

6  **LS1.2 Listen to a conversation between two students and answer the questions.**

- 1 Which of the two extracts has Farid just read?
- 2 In what ways is the book ironic?
- 3 Can you summarise what he says about *Wuthering Heights*?

7  **LS1.2 Listen again and decide if the sentences are true or false.**

- 1 *Wuthering Heights* is the same as most other romantic books.
- 2 Catherine falls in love with a rich, kind man.
- 3 Catherine's father bullies Heathcliff.
- 4 Hindley and his wife Frances look after Heathcliff.
- 5 Catherine and Heathcliff spend a lot of their time together.
- 6 Catherine then marries Edgar because she loves him.
- 7 Farid tells Maher what happens at the end of the story.
- 8 Farid says that Heathcliff wants revenge because he had been badly treated.

8 REFLECT In pairs, discuss the questions.

- 1 In the book, life on the moors is often as cruel as the people who live there. In what ways do you think people can be affected by the place they live in?
- 2 It is hard to like Heathcliff in *Wuthering Heights*. Do you think readers should like all the main characters in a book, or is it good to question why people are good or bad?

9 WRITING TASK Find out what happens in the rest of *Wuthering Heights* and write a summary of the plot in about 200–300 words. Present your summary to your partner at the start of the next lesson.

FROM PAGE TO LIFE

Wuthering Heights has had a major influence on popular culture. It has been made into several films (the first dating to 1939), TV series, plays and even operas. There have also been versions of the film made in Spanish, Hindi, French, Japanese and Filipino.

Unit 1, Lesson 1A Present and past tenses

We use the **Present Simple** to talk about:

- habits and routines: *He often **loses** touch with his colleagues.*
- permanent situations around the present time: *He now **shares** a flat with a friend.*
- states (verbs not usually used in the continuous form), e.g. *love, like, believe, think* (opinion), *know, look* (appearance): *He **loves** getting traditional letters. She **looks** very fit.*

Some state verbs change their meaning and can be used in the continuous form, e.g. *think of/about, see* (go out with), *look at*:

*What **do** you **think** of this message?* (opinion)

*What **are** you **thinking about**?*

*I **don't see** why you want to stay in touch with him.* (understand)

*I'm **seeing** Amer these days.* (go out with)

*I'd like to establish contact with that company, but my boss **doesn't look** at it that way.* (think in a particular way)

*Why **are** you **looking** at me that way?*

We use the **Present Continuous** to talk about:

- actions in progress at the time of speaking: ***He is talking** on his mobile.*
- temporary actions in progress around now: ***He's thinking of** getting a new phone.*
- changes and developments: ***The news is spreading** quickly.*

We also often use the Present Simple and Present Continuous to talk about the future. See Unit 2, page 15.

Present Perfect Simple and Continuous

These link the past and the present. We use the **Present Perfect Simple** to talk about:

- the duration of states that began in the past and continue up to now: ***He's been stuck** here for five years.*
- completed past actions with a present relevance/result: ***The lights have gone out.*** (And now it's pitch dark here). ***He's changed** dramatically.* (He looks very different now.)
- experiences during a present period of time: ***I've sent** five thousand text messages so far.*

We use the **Present Perfect Continuous** to talk about:

- the duration of actions that began in the past and continue up to the present: ***I've been waiting** here since 9 a.m.*
- past processes with a present relevance/result: ***I've got better grades** because **I've been studying** a lot lately.*

We use the **Past Simple** to talk about actions or events completed at a specific time in the past: *Neil Papworth **sent** the first text message in 1992.*

We use the **Past Continuous** to talk about actions that were:

- in progress at a specific time in the past (this often provides background to other past events): *While Hani **was waiting for** us, his mum **was texting**.*
- interrupted by a shorter past action: *She **was studying** when suddenly somebody **tossed** a brick through the window.*

We use the **Past Perfect** to show the relationship between a situation in the past and an earlier state or action. The rules are similar to the rules for the Present Perfect: *Before Hassan met his wife, he **had been** single for a decade.*

Unit 1, Lesson 4A Question tags and echo questions

A **question tag** is a short question added to the end of a sentence that confirms something that the speaker already knows. It is formed using *do / does / did* (in simple tenses) or the auxiliary + a pronoun.

A positive statement usually has a negative question tag and a negative statement has a positive question tag: ***You don't understand, do you?***

She usually comes in late, doesn't she?

You are coming to the dinner, aren't you?

They haven't been to London yet, have they?

They went to school, didn't they?

She had a break, didn't she?

We had met them before, hadn't we?

This is an amazing house, isn't it?

Nothing has happened so far, has it?

Those are Majeda's guests, aren't they?

Modal verbs are usually repeated in the tag questions, just like auxiliaries: ***I can** email my CV, **can't I?***

Exceptions: **Let's** go to the cinema, **shall we?**
Someone has bumped into your car, **haven't they?**

Nobody came to the presentation, **did they?**
I'm still employed, **aren't I?**

Question tags can also be used for:

- **requests:** Buy me the newspaper, **could you?**
You'll cook the dinner today, **won't you?**
- **invitations:** Come to visit us next summer, **won't you?**
- **commands:** Write it down, **will you?**
Don't make a mess, **will you?**

Question tags are also used in **echo questions**.

The main use of such questions is to show interest or express surprise and make a conversation go smoothly:

A I used to live in Aqaba.

B **Did you?** I bet it was amazing!

Unit 2, Lesson 1A Future forms for predictions

We use **will**:

- to make predictions based on our opinions or expectations. We often use *will* with phrases like *I think, I'm sure, I expect*, or adverbs like *possibly, probably, definitely*:
He'll probably be late, as usual.
I'm sure you won't have any problems with it.
- to express a decision made at the moment of speaking: *On second thoughts, I think I'll leave it till the weekend.*

We use **going to**:

- to talk about existing plans or intentions for the future: *I'm going to study Architecture at college.*
- to make a prediction based on evidence you have now: *You are going to have a busy weekend!* (I know all the things my friend has to do at the weekend.)

We use the form *will + be + Present Participle*, sometimes referred to as the **Future Continuous**:

- to talk about an action that will be in progress at a particular time in the future:
By the end of the century, more people will be living in the country than in cities.
Will you be working on it at 5.30?
- to talk about events that will happen as part of the normal course of events, or routine:
She'll be visiting her family at the weekend. (She does it every weekend.)

As with other continuous forms, we do not use state verbs (*be, believe, forget, like, want*, etc.) with the Future Continuous.

We use the form *will + have + Past Participle*, sometimes referred to as the **Future Perfect Simple**, to talk about an action that will be completed before a particular time in the future: *In 100 years' time half the world's languages will have disappeared.*
Will you have finished it by then?

If we want to focus on a duration of an action which is still ongoing at some point in the future, we use the form *will + have + been + verb -ing* (it is sometimes referred to as **Future Perfect Continuous**): *I will have been living in Berlin for three years in July.*

The Future Continuous, the Future Perfect and the Future Perfect Continuous are often used with **by** (*2050, next year, then, the time*, etc.) and **in** (*ten years, two months*).

Other modal verbs can be used instead of *will* with Future Continuous and Future Perfect forms to show different degrees of certainty (*might, may, could*).

We can use certain phrases with the structure **be + adjective + infinitive** to talk about how probable it is that a future prediction will actually happen:

- **be bound/certain/sure to** (this is almost definite)
- **be likely to** (this is probable)
- **be unlikely to** (this is improbable)

Unit 2, Lesson 6A Future forms for plans and hopes

We can use the **Present Simple** for timetabled or scheduled events: *The train leaves at ten o'clock.*

We can use the **Present Continuous** for future arrangements with another person: *We're meeting next Thursday at midday.*

We can also use other phrases to talk about the future.

- For plans, we can use **be planning/hoping to + infinitive** or **be thinking of + gerund**:
I'm planning to get someone to fix my car.
They're hoping to do it soon.
I'm thinking of creating a website.
- When something is happening very soon we can use **be about to + infinitive**: *They're about to announce a new competition.*

- For timetabled events we can use **be due to + infinitive**: *It's due to go on display next week.*
- For formal or official arrangements, instructions or commands we can use **be to + infinitive**: *The prince is to visit the new hospital and talk to the patients.*

Unit 3, Lesson 1A Past and present habits

- We use the **Present** or **Past Continuous + always / constantly / forever** to talk about a habit which is repeated more than usual, which the speaker finds unexpected or annoying: *She's always complaining about the weather.* (present)
She was forever arguing with her parents when she was younger. (past)
- We use **will/would + infinitive** to talk about behaviour which is typical or characteristic of the person. They can describe both pleasant and annoying habits: *She'll turn up at 11 o'clock and act as if nothing's wrong.* (present)
We'd spend the afternoons reading. (past)
- We use **used to + infinitive** to talk about a past state or repeated past actions:
I used to feel very negative about my job.
At our old house I used to spend a lot of time with my friends.
Would is not used to talk about past states.
- We can introduce new topics with **used to** and we do not need to specify a time:
I used to eat a lot of chips and burgers, but now I eat healthy food. (NOT I'd eat ...)

We use **would** when the topic has been established and we usually specify the time:
My dad used to work nights. He would come home at six in the morning and we 'd have breakfast together, then he used to take me to school.

Most texts describing habits contain a mixture of these forms.

Unit 3, Lesson 5A Relative clauses

We use *who(m), which, that, whose, where, when* in **relative clauses**. We use them after nouns, or noun phrases, to describe or give information about a person, thing, possessions, places and time.

There are two kinds of relative clauses: defining and non-defining.

Defining clauses are necessary to give

essential information about exactly which person/thing is being talked about in the sentence. Commas are never used.

We can use *that* instead of *who/which* in defining clauses: *The person who/that designed the house is a world-famous architect.*
The land where the house is built is extremely picturesque.

When the relative pronoun is the object of the relative clause, you can omit *who/which/that*: *The house (which/that) the family has built is unique.*

When the relative pronoun is the subject of the relative clause, you cannot omit *who/which/that*: *It was the woman who/that had arrived earlier that day.*

There are two kinds of **non-defining clauses**:

- to give extra, non-essential information about the person or thing being talked about in the sentence: *He had just arrived home with his wife, who had been working that afternoon.*
The building, which many considered ugly at first, is today a UNESCO World Heritage site.
- to add a comment about the first part of the sentence. We always use *which* in these clauses: *People from all over the world visit the museum, which shows how deeply they are interested in learning about science.*

Non-defining clauses always need commas: on either side if it's in the middle of the sentence, or before if it's at the end.

We never use *that* in non-defining clauses.

Prepositions in relative clauses

Prepositions usually go at the end of the clause in conversational English. In more formal written and spoken contexts, they can go at the beginning, but must be followed by *which* (for things) or *whom* (for people):

This house is more modern than the last house (which/that) they lived in. = This house is more modern than the last house **in which** they lived.
The architect knew the couple (who/that) he had designed the house for. = The architect knew the couple **for whom** he had designed the house.

Unit 3, Lesson 5A Participle clauses

We use a **Present participle clause** for an action or state that happened at the same time or after an event in the story:

His system transformed their lives, enabling them to read and write. (because it enabled them)

Participle and main clauses must have the same subject.

A present (*starting*) or past (*started*) participle is often used to replace a relative clause:

- We use a **Present participle** to replace a relative clause with an active verb, e.g.
*There was a wire **which attached** the phone to the wall. = There was a wire **attaching** the phone to the wall.*
- We use a **Past participle** to replace a relative clause with a passive verb, e.g.
*The copy **which was made** by the carbon paper was called the carbon copy. = The copy **made** by the carbon paper was called the carbon copy.*

Unit 4, Lesson 1A Narrative tenses; Past Perfect Simple and Continuous

When we are telling a story about the past, we usually use the Past Simple for the main events and the **Past Perfect Simple** and **Past Perfect Continuous** to provide background information to those events.

Past Perfect Simple

subject + *had* (not) + past participle

We use the Past Perfect Simple to talk about:

- the duration of states before a specific point in the past: *She **had been** blind for 12 years when she started her journey.*
- completed earlier actions with a relevance to the time of the story: *He wrote about a spot that he **had discovered** on the surface of Venus.*
- experiences that happened before a specific point in the past: *By the time he died, he **had written** a lot of letters.*

Past Perfect Continuous

had (not) + *been* + present participle

We use the **Past Perfect Continuous** to talk about:

- the duration of actions that began earlier in the past and continued to the time of the story: *He **had been studying** bird migration for years.*
- earlier past processes with a relevance to the main events in the story: *He had an accident with a pair of scissors that he **had been playing** with.*

We often use linking words or time phrases with the Past Perfect tenses, e.g. *when, after, because, as, before, by, by the time.*

*By the age of 15, he **had completed** his system.*

*He missed that event **because** he **had been** in hospital for two weeks.*

- We use the **Past Perfect Continuous** when we want to focus on the duration of an activity or when we are explaining a past result: *She was tired because she **had been flying** for hours.*
- We do not use the Past Perfect Continuous with repeated actions when we say how many times something happened: *She **had been visiting** him regularly.* NOT *She ~~had been~~ visiting him three times.*

Unit 4, Lesson 3A Negative inversion

We use **negative inversion** to add emphasis (special meaning) to a sentence: negative adverbial + auxiliary verb + subject + clause
*I had never felt so afraid. → **Never had I felt** so afraid.*

Some common adverbs and adverbial phrases are: *seldom/rarely never/at no time hardly/barely/scarcely ... when ... under no circumstances/in no way no sooner not only ... but also ... little (did I/they know/imagine ...) Only (when) ... Not once (did) ...*

Negative inversion can sound quite formal, but it is also used in more informal contexts for dramatic effect.

Unit 5, Lesson 1A Gerunds and infinitives

Infinitives

We use an infinitive with *to*:

- to explain the purpose of an action: *You should eat them **to reduce** your risk of heart failure.*
*Sugar is added **to make** the bread rise.*
- after certain verbs: *You **need to make** sure you drink a lot of water.*
*They often **fail to notice** all the details.*

Other verbs: *agree, allow, appear, attempt, encourage, expect, force, help*, persuade, plan, promise, refuse.*

Help* can also be followed by the infinitive without *to*: *They may **help your brain (to) grow.*

- after certain adjectives: *They're **quick and easy to cook.***

*It's **important to remember** that ...*

Other examples: *difficult, easy, helpful, likely.*

- after *first, second, third, last*, etc.: *I'd be the **last to help** him!*

Infinitive without to

We use an infinitive without *to* after *let* and *make*: *They may **make** you **feel** happier.*

Let your heart **slow** down.

Gerunds

We use a gerund (-ing form) in the same way as a noun:

- as the subject of the sentence: **Jogging** is good for you.
Making bread involves ...
- after certain verbs: You should also **avoid stopping** suddenly.
It **involves taking** a test.

Other verbs taking a gerund: *can't stand, consider, don't mind, enjoy, fancy, imagine, risk, suggest.*

- after prepositions: ... your risk **of having** a heart attack.
... to prevent it **from rising** too much.
- after **be used to** and **get used to**: **I'm not used to pushing** my body to the limit. (The situation is unfamiliar to me and I am not comfortable with it.)
I'm getting used to doing more exercise. (The situation is becoming more familiar, but I am not comfortable with it yet.)

Infinitive or gerund

The following verbs can be followed by the infinitive with *to* or the gerund, with no difference in meaning: *begin, continue, hate, love* and *start*.

We use *prefer* + infinitive with *to* for a specific situation: *I'd prefer to stay* in tonight.

We use *prefer* + gerund to talk about general preferences: *I prefer staying* in to going out.

Unit 5, Lesson 3A Verbs with gerunds and infinitives (change in meaning)

Verbs followed by an infinitive or a gerund, with a change in meaning:

remember + infinitive (to remember something, then do it): *I always remember to take* a sandwich with me.

remember + gerund (to do something and remember it later): *I remember thinking* that I needed to find a system.

forget + infinitive (to forget about something, so you don't do it): *I forgot to mention* that ...

forget + gerund (to do something and (not) forget it later): *I'll never forget failing* that exam.

forget + gerund is usually used in the negative.

try + infinitive (to make an effort to do something difficult): *I always try to plan* it so that ...

try + gerund (to do something and see what happens): *You should try working* in the library.

try + gerund is often used for giving advice.

stop + infinitive (to stop something in order to do something else): *I keep stopping to make* a cup of tea.

stop + gerund (to no longer do something): *I don't stop studying* till I've finished.

like + infinitive (to do something because it is a good idea): *I like to spend* at least three hours a day in the library.

like + gerund (to enjoy something): *I like working* at home.

- To talk about a completed action after the verbs: *feel, hear, listen to, see* and *watch*, we use object + infinitive without *to*: *I saw somebody fall* in the water.
- To talk about an action in progress after those verbs, we use object + gerund: *I saw him talking* to the lifeguard.
- After the verbs *need, deserve* and *require* the gerund has a passive sense: *needs cleaning* = needs to be cleaned.

Unit 5, Lesson 6A Would rather, would sooner

- We use an infinitive without *to* after *would rather* and *would sooner*: *I'd rather go* to the park.

We could eat later if you would rather do that.

My sister would rather not go to Italy. It's too hot there.

I'd rather dive than *lie* on the beach.

She said she'd sooner die than *live* in the countryside.

Note: *I'd sooner* is more formal than *I'd rather*.

- We use *would rather* + subject + past tense to say that we don't want somebody to do something: *I'd rather you cleaned* the bathroom.
I'd rather you didn't go there alone.

STUDENT A

Unit 3, Lesson 5A Exercise 8, page 32

Complete the text about an item of old technology with relative pronouns and the correct form of the verb *to be*. Use participle clauses where possible.

Fax, ¹ _____ short for 'facsimile', or 'copy', is a technology ² _____ nowadays largely obsolete. A fax machine, ³ _____ pictured here, was something ⁴ _____ used to transmit text and images over the phone. These large machines, ⁵ _____ very popular in the 1990s, are now mainly museum pieces. However, in some countries, ⁶ _____ electronic signatures on contracts are not yet legally recognised, they are still used.

Now tell your partner about the piece of technology, without looking at the text you have completed. Don't forget to use relative clauses and participle clauses.

Unit 5, Lesson 6A Exercise 6, page 55

You want to go out for dinner with Students B and C. These are your preferences:

- You don't like packed places.
- You like informal, simple places.
- Somewhere with a terrace / garden.

ALL STUDENTS

Unit 1, Lesson 4A Exercise 8, page 9

In pairs, use some of the conversation starter questions to prepare a short dialogue. Use question tags and echo questions.

- 1 What was the best thing you did this year?
- 2 What's your favourite kind of books?
- 3 What would you do if you were king for the day?
- 4 Where would you live if you could live anywhere in the world?

Unit 2, Lesson 4A Exercise 8, page 19

Prepare a short presentation (2–3 minutes) about an endangered species. Research information about one species. Describe their physical appearance and habits and explain why they are under threat.

Unit 2, Lesson 5A Exercise 2, page 20

Study some ideas for the competition in Exercise 1 on page 20.

1 Our idea: Ban single-use plastic water bottles at school – students bring reusable water bottles instead.

Benefits for the environment: Reduce plastic use. If every student buys or brings in a single-use plastic bottle every day, that's 2,000 bottles a day.

How we will use the grant: Install drinking fountains, and set up campaign to encourage students to bring in reusable water bottles.

2 Our idea: Set up a day when everyone living less than two miles from school agrees to walk or cycle to school (rather than being driven in by their parents). Those living further away who usually come by car agree to share cars with at least one other student.

Benefits for the environment: Reduce pollution on that day and encourage people to make it a regular thing.

How we will use the grant: Make a short film about the project to encourage other schools in the area to try the same thing.

3 Our idea: Clothes swap. Everyone brings clothes they no longer need and swap them for different items.

Benefits for the environment: Students stop buying so many new clothes, which reduces the impact on the environment of manufacturing them.

How we will use the grant: Publicise and promote the event and pay for the hire of a venue.

Unit 3, Lesson 1A Exercise 5, page 27

Text A describes a typical youngest child – youngest children are usually rebellious and can be a bit naughty.

Text B describes a typical older child (or only child) – older children are high achievers and want to please their parents.

Text C describes a typical middle child – middle children don't have such clear typical characteristics, but tend to be quieter and more inward-looking than their siblings; they are often good at negotiating.

Unit 4, Lesson 1A, Exercise 10, page 37

Use the prompts in the box to invent a real or fake news story. Practise telling the story using Past Perfect Simple or Continuous where appropriate and some of the vocabulary from Unit 4 Lesson A. When you tell your story to the class. Can they tell if it is real or fake?

a bizarre theory a famous person
a film review a secret a sports event
a weather event clues

Unit 4, Lesson 6A, Exercise 2, page 43

- 1 This story is probably false, but the writer Douglas Adams claimed it happened to him in 1976. There are similar legendary tales about people who accidentally became thieves in England and the USA.
- 2 This story is definitely false. It was invented as a newspaper April Fool's story.
- 3 This story is probably false, though a robot camera did find a large alligator living in the sewers in Florida.

Unit 5, Lesson 1A, Exercise 2, page 48

Items 2 and 6 are not true.

STUDENT B

Unit 1, Lesson 6A Exercise 5, page 11

In pairs, role play the two situations. Use language for expressing emotions and for responding from Lesson 6.

- 1 Ask how your friend feels about winning first prize in an art competition. Respond to what your partner says by congratulating him/her.
- 2 Your parents unexpectedly gave you a brand-new phone. You're very pleased. Tell your friend about it.

Your partner is going to tell you about two different situations. For each situation which your partner describes, respond according to these instructions.

- 1 Reassure your friend.
- 2 Express your sympathy.

Unit 3, Lesson 5A Exercise 8, page 32

Complete the text about an item of old technology with relative pronouns and the correct form of the verb *to be*. Use participle clauses where possible.

In the late 1980s and early 1990s, ¹ _____ a time ² _____ mobile phones were too expensive for most people, it was fashionable to carry a pager. This was a simple piece of technology, ³ _____ designed to fit in your pocket and ⁴ _____ sent out a notification ⁵ _____ let you know that someone was trying to contact you. You then needed to find a phonebox ⁶ _____ you could ring them. Pagers are still used nowadays in situations ⁷ _____ you need to know when something is ready – like a food order in a restaurant for example.

Now tell your partner about the piece of technology, without looking at the text you have completed. Don't forget to use relative clauses and participle clauses.

Unit 5, Lesson 6A Exercise 6, page 55
